

INTRODUCTION

The execution of U.S. Government (USG) Security Cooperation (SC) programs involves the management of substantial amounts of funds. The fact that Foreign Military Sales (FMS) operates under a legislatively mandated “no-loss” concept and an administratively mandated “no-gain” policy enforces the requirement for effective financial planning and accountability and has caused the creation of data collecting and reporting systems peculiar to FMS. The Building Partner Capacity (BPC) programs also require attentive financial management and planning due to their expiring and cancelling funds legislative limitations. Financial management is far-reaching and must be considered by all functional disciplines in the SC community throughout the life-cycle of cases and programs. This chapter will discuss processes and procedures of USG organizations that are based on established Department of Defense (DoD) fiduciary requirements. Management at all levels of the DoD must ensure these processes and procedures are adhered to upon implementation and execution of SC cases and programs. The primary financial management references that are highlighted and discussed in this chapter include the *DoD Financial Management Regulation* (FMR) 7000.14-R volume 15 (Security Cooperation Policy), Defense Security Cooperation Agency (DSCA) *Security Assistance Management Manual* (SAMM) Manual 5105.38-M chapter 9 (Financial Policies and Procedures), chapter 16 (Case Reconciliation and Closure), and the SAMM appendix 7 (Case Reconciliation and Closure Guide (RCG)).

FINANCIAL MANAGEMENT RESPONSIBILITIES**U.S. Congress and State Department (DoS)**

The U.S. Congress and Department of State (DoS) are discussed in chapter 3 of this textbook, “United States Government Organizations.” The U.S. Security Cooperation (SC) and Security Assistance (SA) financial management responsibilities include the Congressional enactment of the required SA/SC legislative authorization and appropriation acts. The DoS and DoD coordinate and provide input to Congress in the development and establishment of that legislation. There is extensive financial management involvement and oversight by DoS in fulfillment of that organization’s responsibilities for continuous supervision and general direction of economic assistance, military assistance, military education and training, and sales and export programs.

Under Secretary of Defense (Comptroller)

The DoD Under Secretary of Defense (Comptroller) (OUSD[C]) is the principal advisor to the Secretary of Defense on all budgetary and fiscal matters, including the development and execution of the Defense Department’s annual budget. As the DoD’s Chief Financial Officer, OUSD(C) also oversees the Department’s financial management systems, business modernization efforts, and financial policy. The DoD Financial Management Regulation (FMR) is issued by OUSD(C) under the authority of DoD Instruction 7000.14, “DoD Financial Management Policy and Procedures.” The DoD FMR applies to the Office of the Secretary of Defense, the Military Departments, the Office of the Chairman of the Joint Chiefs of Staff and the Joint Staff, the Combatant Commands, the Office of the Inspector General of the DoD, the Defense Agencies, the DoD Field Activities, and all other organizational entities

within the DoD (hereinafter referred to collectively as “DoD Components”). DoD FMR volume 15 (Security Cooperation Policy) directs statutory and regulatory financial management requirements, systems, and functions for all appropriated and non-appropriated, working capital, revolving, and trust fund activities.

Defense Finance and Accounting Service (DFAS)

Defense Finance and Accounting Service (DFAS) headquarters is located in Indianapolis, Indiana and is the organization responsible for the implementation of all accounting and finance activities within the DoD.

Defense Finance and Accounting Service, Security Cooperation Accounting (DFAS SCA)

Defense Finance and Accounting Service, Security Cooperation Accounting (DFAS SCA) is the DFAS organization that has the following financial responsibilities as they relate to the SC programs within DoD:

- Account for the daily operations and fund transfers to and from the FMS trust fund
- Provide obligation and expenditure authority to DoD components for the financial execution of security cooperation cases and programs
- Operate the Defense Integrated Financial System (DIFS) computer information system for centralized DoD-wide delivery reporting, collecting, forecasting, and billing for security cooperation cases and programs
- Perform continuing cash analysis to ensure sufficient customer cash is available to pay DoD, military departments (MILDEPs), and DoD procurement vendors
- Prepare, review, and dispatch all security cooperation billing and holding account statements
- Perform final accounting actions to close cases and render final accounting statements
- Provide assistance to, and interact with, DoD and MILDEPS regarding security cooperation logistical and financial systems, projects, policies, and procedures
- Participate with DoD and MILDEPs as required in security cooperation reviews within and outside the U.S.

Defense Security Cooperation Agency (DSCA)

The primary functions of the Defense Security Cooperation Agency (DSCA) are described in DoD Directive 5105.65 and are also discussed in chapter 3 of this textbook. The financial elements of those duties include the management of the FMS trust fund, Foreign Military Financing Program (FMFP), Security Cooperation Organization (SCO) program management, International Military Education and Training (IMET) program, FMS administrative fund, and numerous Building Partner Capacity (BPC) programs. In addition, DSCA schedules and chairs the Financial Management Reviews, supervises the financial implementation of FMS and BPC Letters of Offer and Acceptance (LOAs), and also has waiver authority for most of the FMS-related costs described in this chapter.

Financial Management Review (FMR) Program

The Financial Management Review (FMR) program constitutes a country-level review of an FMS customer’s total program (i.e., all the country’s FMS cases), taking into account current and projected requirements and anticipated resources, including FMFP grants, Military Assistance Program (MAP) grants, and budgeted purchaser funds. Each quarter, DSCA selects up to four FMS customer programs for review and requests selected financial data in the form of a case worksheet and tasking letter to

the applicable implementing agencies (IAs). Following consolidation and analysis of the data, DSCA meets or corresponds with IAs, as appropriate, to follow-up on recommended actions prior to the FMR commencement. The FMR will then be held as scheduled, with representation and participation from DSCA, IAs, the applicable SCOs, and foreign purchaser countries. [SAMM C9.14.1]

Case Writing Division

The mission of DSCA's Case Writing Division (CWD) is to review all LOAs for consistent policy application. When developing payment schedules, the responsibility for providing accurate data in developing line prices and payment schedules on an LOA document is the responsibility of the IAs. The CWD has the responsibility of reviewing the price and payment schedule data for correct application of policy, waivers, and cost recovery rates in regard to the FMR and SAMM. [SAMM C5.T8]

Implementing Agencies and Military Departments

A discussion of each IA and MILDEP organization for FMS is included in other chapters of this textbook. The following types of organizational components have a financial role in security cooperation programs and cases.

- Service headquarters: Review LOAs (when required by IA policy) and provide service-wide policy and oversight (including financial waiver recommendations, case unique payment schedules, etc.)
- Systems, logistics [including the IA's International Logistics Control Organizations (ILCOs)], and training commands: Prepare the Price and Availability (P&A) and LOA data, coordinate as required to acquire and deliver the material and/or services and training on the implemented LOA, maintain detailed case logistics and financial records for accounting and reconciliation, and certify case for closure to the Defense Finance and Accounting Service (DFAS) Security Cooperation Accounting (SCA).

The Defense Security Assistance Management System (DSAMS) is used by the MILDEP Implementing Agencies (IAs) and the DSCA Case Writing Division (CWD) to compute LOA prices and payment schedules. The financial execution and reconciliation, however, is conducted by the MILDEPs and DoD agencies utilizing a variety of computer information systems that are discussed in appendix 1 of this book, "Security Cooperation Automation."

Security Cooperation Organizations (SCOs)

The Security Cooperation Organizations (SCOs) are discussed in chapter 4, "*Security Cooperation Organizations Overseas*," in this textbook. The SCO financial management responsibilities include:

- Initial point of contact with FMS purchaser for issues and communications
- Support Reviews (e.g., financial, program, reconciliation, etc.)
- International Military Education and Training (IMET)—Budgeting and execution
- Foreign Military Financing (FMF)—Budgeting and execution
- Ensuring that the foreign government is aware of U.S. FMS credit financing policies. Any exceptions must be fully justified and submitted through the Chief of the U.S. Mission to DSCA for interagency coordination and approval or disapproval. [SAMM C9.7.2.7]

Foreign Purchaser

The foreign purchaser also has important SC financial management responsibilities including:

- Budget funds as required

- Timely payment of bills
- Requesting and coordinating with the USG on any required special financial plans (Interest Bearing Accounts (e.g., Commercial or Federal Reserve Bank), Standby Letter(s) of Credit (SBLC), Special Billing Arrangements (SBAs), unique case payment schedules, financial waivers, etc.)
- Support Reviews
- Financial Discrepancy Reporting

Industry

Companies that provide Security Cooperation articles and services per their contract(s) with the USG have multiple responsibilities including:

- Coordinate with USG on development of P&A and LOA price estimates.
- Negotiate and sign contracts for procurement of LOA materials and services.
- Coordinate with USG Implementing Agencies, contracting officers (e.g., DCMA) and auditors (e.g., DCAA) on delivery of contract materials and/or services in support of the LOAs.
- Timely and accurate billing to the USG for work and services performed.

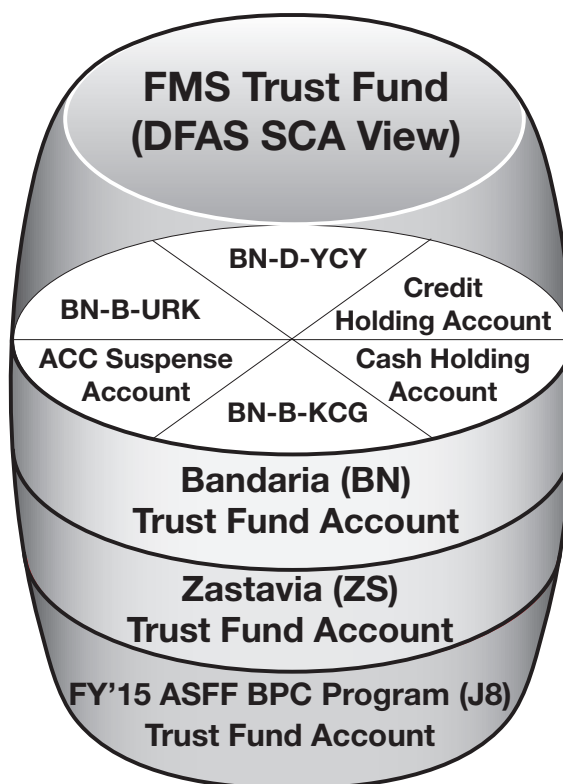

FUNDS MANAGEMENT

Foreign Military Sales Trust Fund

The FMS trust fund is a U.S. Treasury account [FMR volume 15, chapter 1, section 010201] credited with receipts, earmarked by law and held in a fiduciary capacity by the USG, to carry out specific SC purposes and programs. The complete fund cite, 97-11 X 8242, is required for consolidated financial statements and reports to the Department of the Treasury and the Office of Management and Budget. The FMS trust fund represents the aggregation of SC cash received from USG, purchaser countries, and international organizations. DSCA is responsible for management of the trust fund. DFAS SCA is responsible for trust fund accounting. See the figure 12-1 for a notional view of the FMS Trust Fund.

Customer cash deposits for defense articles and services sold under the Arms Export Control Act (AECA) sections 21 and 22, are made in advance of delivery of material or performance of services and for making progress payments to contractors. These cash deposits are identified and accounted for at the case and line levels. DFAS SCA exercises stringent controls over the FMS trust fund to ensure proper visibility and accountability are maintained for all payments made by a customer for every case. The integrity of customer country or USG program funds must be strictly observed and certain established principles guide the management of the trust fund. All cash disbursements for a country or international organization are identified by case and should not exceed the customer's total cash deposits. A specific case may temporarily be in a deficit cash position with the deficit being funded by the customer's cash advances on other cases. However, the cash deposited by one country will not be used to liquidate obligations incurred on behalf of another country. A reportable adverse financial condition exists when the country level cash summary accounts are in a deficit position. Ultimately, dollars placed in the FMS trust fund are subject to U.S. Treasury accounting system controls from the date of receipt to the date of expenditure or refund. [FMR chapter 4 (Accounting Policy and Procedures) and SAMM C9.3.9 and C9.11.1]

Figure 12-1
Notional View of FMS Trust Fund

Holding Accounts

DFAS SCA maintains purchaser's holding accounts in the FMS trust fund. The holding accounts are sub-accounts of funds that are not identified to a specific case. These funds could be a result of excess funds left when an FMS case is closed, a quarterly payment by an FMS customer that does not identify to which case the payment should be applied, or as part of case cross leveling transactions. Normally, funds on deposit in a purchaser's holding account are not removed without the consent of the purchaser, but the FMS customer may request DFAS SCA to "draw upon" its holding accounts for transfers to specific cases as needed. The holding account balances are not included in the totals of the DD Form 645. Separate statement(s) (as attachment(s) to the quarterly DD Form 645) are provided to the country showing deposits and withdrawals to each holding account for that country.

Purchasers have at least one, but may have numerous holding accounts for different purposes. The holding account identification information is documented in the Holding Account Statement section in the Billing portion of this chapter.

Flow of Funds

Figure 12-2 depicts a block diagram, providing the "big picture" relating to the flow of FMS funds in and out of the FMS Trust Fund. Details and interfaces are omitted to emphasize concepts. For BPC cases, there is a similar flow of funds with the "Purchaser" being the USG, and removal of the FMF and IBA/CBA from the diagram. The following is a brief explanation of how to interpret the flow diagram.

Financial Requirements

The funds flow process starts with the USG placing financial requirements on the purchaser. These requirements are generally of one of two forms including:

- The initial deposit requirement documented in the LOA.
- Quarterly payment requirements, which are documented in the estimated payment schedule of the LOA and subsequently incorporated in the quarterly DD Form 645, issued by DFAS SCA.

**Figure 12-2
Flow of Funds**

Purchaser Sources of Funds

Based on USG financial requirements, the purchaser must respond by providing the funds requested. The purchaser normally has two sources of financing: cash and USG credit (i.e., grants or loans). From a USG perspective, cash payments by the purchaser means the absence of USG grants or loans. [SAMM C9.7] Purchasers may pay DFAS SCA directly by wire transfer or by check. Direct cash payments are mailed or wire transferred to DFAS SCA in accordance with instructions provided in the LOA and the quarterly billing statement.

Interest Bearing Accounts (IBA)

In response to the initial deposit and quarterly billing requirements, a purchaser may also make payments (if authorized), to a separate interest bearing account (IBA). DFAS SCA is authorized to then withdraw funds from the IBA for transfer into the FMS trust fund. The IBA may be either a Federal Reserve Bank (FRB) account or Commercial Banking Account (CBA) as described below.

Federal Reserve Bank (FRB) Accounts

Some countries (if approved) may establish an account with the FRB New York for their FMS deposits. An agreement between the FMS purchaser's defense organization, the purchaser's central bank, FRB New York, and DSCA identifies the terms, conditions, and mechanics of the account's operation. Except as authorized by law and/or DSCA policy, FRB accounts do not include FMFP funds. [FMR volume 15, chapter 4, section 040102E and SAMM C9.11.2]

Commercial Banking Account (CBA)

Some countries may establish an account with a commercial bank for FMS deposits. Commercial banking accounts do not include FMFP funds. Two agreements are required:

- An agreement between the FMS purchaser and the participating U.S. commercial bank
- An agreement between the FMS purchaser and DSCA

These accounts operate in a very similar fashion to the FRB New York interest bearing accounts. [FMR volume 15, chapter 4, section 040102F and SAMM C9.11.3] The DSCA Policy Memorandum 04-02 “FMS Transformation Deliverable: Implementation of Commercial Banking Account (CBA)” documents the guidelines and criteria for countries to participate in CBA arrangements for the purpose of depositing certain funds associated with FMS cases.

DoD Financial Controls

The following discussion concerns the creation of budget authority, methods of funding, and the flow of obligational authority (OA) and expenditure authority (EA) to the DoD components. The LOA does not in itself create Budget Authority (BA) in either the FMS Trust Fund or in a DoD appropriation or fund account; however, it is required for establishing BA. (FMR volume 15, chapter 2, section 020202]

Budget Authority

DoD’s budget authority (i.e., USG legal financial authority) is provided by law and it allows the DoD to enter into obligations that will result in immediate or future outlays from federal government accounts. The most basic form of budget authority is appropriations. Security cooperation LOA budget authority is created through the IAs preparation and processing of five forms, as applicable:

- LOAs
- LOA modifications
- LOA amendments
- FMS Obligational Authority DD Form 2060 (or automated equivalent) [FMR volume 15, chapter 2, section 020202E]
- FMS Planning Directive DD Form 2061 (or automated equivalent) [FMR volume 15, chapter 2, section 020202D]

Budgetary control of an FMS agreement begins after acceptance of the sales offer by the purchaser. After the purchaser has forwarded a signed copy of the accepted LOA (with any required initial deposit), DFAS SCA records acceptance of the LOA and then releases to the IA specific values of Obligational Authority (OA) as requested by the IA. The IA must account for, control, and report all obligations and expenditures (disbursements) incurred against the authority received.

Methods of Funding

At the time the initial DD Forms 2061 and 2060 (or automated equivalents) are prepared, it is necessary to determine the planned funding source. The two funding authorities identified on DD Forms 2061 and 2060 (or automated equivalents) are direct cite and reimbursable.

Direct Cite

Direct cite method involves entering and maintaining an FMS trust fund accounting citation on documents relating to SC transactions. For example, the trust fund accounting data is shown on a DoD contract and is the direct funding source for a USG paying office to make payment to a contractor. In accordance with the FMR, new procurement actions should be accomplished to the maximum extent feasible and appropriate through direct citation of the FMS Trust Fund (97-11 X 8242) on applicable contractual documents. [FMR volume 15, chapter 1, section 010303]

Reimbursable

Reimbursable method is used when the MILDEP or DoD agency cites its own performing appropriation as the funding source (e.g., the U.S. Army's missiles procurement appropriation). The DoD component's performing appropriation is subsequently reimbursed by DFAS SCA from case funds held in the FMS trust fund. [FMR volume 15, chapter 1, section 010302]

Flow to Department of Defense Components

The DoD component having implementation responsibility for a given LOA case will request Obligational Authority (OA) and Expenditure Authority (EA) from DFAS SCA at the appropriate times in the life of a case.

Obligational Authority

Obligational Authority (OA) is a financial authority, which allows legally binding financial obligations to be incurred in an amount not to exceed the value of the materials and services requirements on a case. Once the purchaser has accepted an LOA and provided funds to DFAS SCA, and the IA has received OA issued by DFAS SCA, the case can then be implemented and obligations can be recorded. The term "obligation" relates to orders placed, contracts awarded, requisitions submitted, services performed, and similar transactions during a given period that will require payments.

Expenditure Authority

Expenditure Authority (EA) is unique to FMS accounting and was established in order to ensure compliance with the AECA requirement that DoD funds not be used to provide interim financing of FMS requirements. EA is an FMS country level authority, which allows expenditures to be incurred against obligations previously recorded against a country's trust fund account. As a result, before expenditures can be made, the dollars must first be on deposit in the trust fund. In the most basic sense, the term "expenditure" may be thought of as a cash disbursement, such as a payment to a contractor or a reimbursement to an IA. Thus, EA may be requested and accounted for by one of two methods:

- Reimbursement—Reimbursement transactions result in a disbursement for credit to the specific appropriation or fund account
- Direct Cite—Direct Cite transactions result in a disbursement to other than a DoD organization (i.e., a contractor, other federal agency, or employee)

Foreign Military Financing Program (FMFP)

FMFP facilitates the purchase of U.S. military equipment, spare parts, and training by many allies and friendly countries. The following discussion identifies the various terms used in financing programs and briefly discusses policies and procedures. [SAMM C9.7.2]

Department of State (DoS) Role

The Department of State (DoS) in accordance with AECA section 2 is responsible for the continuous supervision and general direction of sales and exports of defense articles and services. In fulfillment of

those responsibilities, the DoS determines which countries will receive grants/loans, unless Congress has enacted into law specific country/amount determinations (i.e., earmarks), prohibitions, or ceilings.

Defense Security Cooperation Agency Role

The President has delegated to the Secretary of Defense the authority to issue and guarantee loans to eligible recipients. The Secretary of Defense has delegated to the Director of DSCA the authority to administer the credit program while ensuring that such funds are used only to buy authorized materiel and services. As such, DoS must first approve the use of loans.

General Policies and Procedures

FMFP credit financing will normally be extended when it has been determined that purchases of defense items cannot be financed reasonably by other means, taking into account any U.S. military and economic assistance that such countries may be receiving, and indigenous private financing. In addition to being evaluated for consistency with U.S. foreign policy interests (including human rights), proposed arms purchases by the country and the suitability of items being purchased will be taken into account. Of particular attention are the level of weapons sophistication and the capability of the country to maintain, support, and employ the items effectively. FMFP credit assistance will not be extended solely to consummate a sale.

Expenditure of FMF funds is subject to legal and policy restrictions. [SAMM C9.7.2.7] Security Cooperation Organizations (SCOs) must ensure that the foreign government is aware of U.S. policies for the use of FMF. SCOs should generally discourage partner nations from using FMF funding for those items identified in SAMM table C9.T10. However, in certain circumstances these items may be permitted to be purchased with FMF funds if the State Department determines that providing such items are critical to the mission, the bilateral relationship, or the defense articles or services are in direct support of coalition operations where U.S. forces are present. SCOs should initiate an early discussion of requests to use FMF funds with DSCA (Operations Directorate) and DoS (PM). To facilitate review of these requests, SCOs should submit a detailed justification and rationale for purchasing each item with FMF funds rather than host-nation funds and any other relevant facts in support of the request. This guidance applies to FMF used for standard FMS cases and Direct Commercial Contracts (DCCs).

All items purchased with FMS credit must be transported by U.S. flag vessels when ocean transportation is used. FMS credit agreements may contain provisions for certain waivers that, if approved, permit shipment of up to 50 percent of FMS credit funded cargo on vessels of the borrowing country, and in certain instances such cargo may be transported on vessels of a third country. Such waivers are discussed in SAMM C.9.7.2.7.4 (Transporting FMS Credit Funded Cargoes). FMS credit funds cannot be used to pay the cost of transportation provided by a vessel of non-U.S. registry. FMS credit may also only be used to pay air transportation costs only if U.S. flag aircraft are used. The Fly America Act (49 U.S.C. 40118) requires first preference for airlift or grant, credit, or guarantee-funded cargo be given to U.S. flag air carriers. Before using a foreign-flag carrier, a shipper or exporter must provide a written explanation to the IA as to why a U.S. carrier should not be used. If a U.S. carrier code-shares with a foreign carrier to deliver a shipment to an overseas airport, it is still considered carriage by a U.S. flagged carrier. [SAMM C7.9.2]

DSCA does not generally make approved loan or grant agreement funds directly available to the borrowing country. Rather, the country must submit invoice documentation (i.e., an LOA requiring an initial deposit or a DD Form 645 requesting payment, or a commercial invoice) to DFAS SCA, along with a request for advance of funds. Once DFAS SCA certifies/approves the request, funds are disbursed as appropriate. If a country is authorized to use FMFP for direct commercial sales (DCS), the borrowing country must submit to DSCA copies of contracts or purchase orders relating to the commercial purchase and a request for advance of funds.

Foreign Military Financing Program for Direct Commercial Contracts

Direct Commercial Contracts (DCCs) are contracts where the purchaser enters into a contract directly with a vendor and the USG is not a party to the contract although FMF is paying for some portion of that contract. The AECA allows ten countries to use their FMF allocation to finance DCCs. The ten countries eligible are: Israel, Egypt, Jordan, Morocco, Tunisia, Turkey, Portugal, Pakistan, Yemen, and Greece. [SAMM C9.7.3] DSCA approves DCCs to be financed with FMF on a contract-by-contract basis. To employ FMFP credit financing for purchases directly from U.S. commercial suppliers, the purchaser must make a formal request through DSCA. A copy of the proposed contract must accompany the request. Materiel and services purchased must be of U.S. origin and the contract must be between the purchaser and a U.S. firm incorporated and actively doing business in the U.S. Prior to disbursement of FMFP funds, the contractor must certify those items and/or services supplied are U.S. source products. DSCA policy precludes the use of FMFP funds for direct commercial purchases of less than \$100,000.00. For further details on the DCC process, contractor eligibility, types of items, and certifications required, see “Guidelines for Foreign Military Financing of Direct Commercial Contracts” <http://www.dsca.mil/programs/foreign-military-financing-direct-commercial-contracts-fmf-dcc> on the DSCA website.

Terms of Sale and Types of Assistance Codes

Terms of Sale [SAMM C9.8] indicate when payments are required and whether the sales agreement is financed with purchaser or USG funds (e.g., FMS Credit (repayable or non-repayable), MAP Merger, etc.) In addition to the Terms of Sale, the related LOA Types of Assistance (TA) codes (in field #5 of each LOA line), also documents the source of the line’s funding source as well as indicating whether the sale of an article or service on an LOA is from DoD stock or new procurement and the applicable AECA statutory authority. TA codes are listed and defined in the LOA information page. [SAMM chapter 5, figure 5 (C5.F5)] The Term of Sale is documented on the first page of the LOA. If an LOA involves more than one term of sale, the IA will cite on the LOA all of the applicable terms. SAMM chapter 9, table 11 (C9.T11) provides a list and definitions of the Terms of Sale for use on LOAs. This information is duplicated in table 12-1 for reference.

Table 12-1
Terms of Sale

Term of Sale	Application
Cash with Acceptance	<p>Used when the initial cash deposit equals the amount in the “Estimated Total Costs” line of the LOA. For BPC cases, the Total Case Value (TCV) is entered by the IA during LOA development into the “Due with LOA Acceptance” field per SAMM table C15.T5</p> <p>Also used for FMSO I even though the initial deposit is less than “Estimated Total Costs” (it must equal the FMSO I Part A value).</p> <p>Used for the procurement of articles and services if the purchaser is not authorized Dependable Undertaking.</p> <p>Used if the purchaser is not authorized Dependable Undertaking and case is solely for procurement, unless specific DSCA approval is obtained.</p>
Cash Prior to Delivery	<p>The USG collects cash in advance of delivery of defense articles and rendering of defense services and design and construction services from DoD resources. AECA, sections 21(b) and 29 (22 U.S.C. 2761(b) and 2769) apply.</p>

Dependable Undertaking	The USG collects cash in advance of procurement contract payment requirements. If AECA, section 22(b) (22 U.S.C. 2762(b)) is applicable based on Presidential action (i.e., payment due up to 60 or 120 days after delivery).
Payment on Delivery	The USG issues bills to the purchaser at the time of delivery of defense articles or rendering of defense services from DoD resources. The first sentence of AECA, section 21(d) (22 U.S.C. 2761(d)) applies. The IA may use this term only pursuant to a written statutory determination by the Director, DSCA, who must find it in the national interest to do so. If AECA, section 21(d) is applicable based on Director or Deputy Director, DSCA action, modify to read “Payment 60 days after Delivery.” If AECA, section 21(d) is applicable based on Presidential action, modify to read “Payment 120 days after Delivery.”
FMS Credit	This term applies to an FMS case financed with repayable FMF funds, or partly repayable FMF funds, extended or guaranteed by the Department of Defense under AECA, sections 23 (22 U.S.C. 2763) and 24 (22 U.S.C. 2764), or under other legislation.
MAP Merger	Applies to FMS cases financed with Military Assistance Program (MAP) Merger funds (FAA, section 503 (22 U.S.C. 2311)).
FMS Credit (Non-Repayable)	Applies to FMS cases financed with non-repayable FMF funds. If the case is financed wholly with these non-repayable funds, the LOA qualifies for pricing benefits (i.e., exclusion of military salaries and NC of research, development, and production of MDE) as provided in FAA, section 503(a) (3) (22 U.S.C. 2311(a)(3)) and AECA, section 21(e) (22 U.S.C. 2761(e))
EDA Grant	Applies to Excess Defense Article—non-reimbursable grant transfers as provided in FAA section 516 (22 U.S.C. 2312j).

Financial Forecasting

LOA payment schedules (when applicable) provide forecasted financial requirements for an FMS case and project the timing and/or amounts of purchaser deposits needed to meet the requirements. Payment schedules for LOA documents are prepared by the DSCA Case Writing Division during the case development process based upon inputs (e.g., source of supply, lead-time, delivery schedules, period of performance, progress payment schedules, etc.) provided by the IA. A payment schedule is developed for each case unless the Term of Sale is “Cash With Acceptance;” or the case is fully funded with FMS Credit (Non-Repayable) and/or MAP Merger, the total case value is less than \$5M, and the country is not authorized cash flow financing. In these instances, the initial deposit covers the entire case value. Implementing DoD components are expected to continually monitor case level cash advances and validate the accuracy of payment schedules. The estimated payment schedule normally includes specific dates when each payment is due and consists of two financial categories:

- An initial deposit
- Estimated quarterly payments

Typically, the payment schedule projects quarterly payments due by the 15th day of March, June, September, and December. Exceptions to these dates must be approved by the DSCA (Business Operations Directorate). SAMM chapter 9, table 12 (C9.T12), as shown in table 12-2, documents how LOA initial deposit and payment schedule dates should be determined.

Table 12-2
Payment Schedule Dates

Offer Expiration/Acceptance Dates of LOAs	Earliest Payment Date on the Payment Schedule	For Period Covering
11 Sep--10 Dec	15 Mar	Apr-Jun
11 Dec--10 Mar	15 Jun	Jul-Sep
11 Mar--10 Jun	15 Sep	Oct-Dec
11 Jun--10 Sep	15 Dec	Jan-Mar

Payment Schedule Content

Payment schedules, to include initial deposits, are built upon IA assumptions and DSAMS inputs such as source of supply, lead-time, delivery schedules, period of performance, progress payment schedules, etc. Payment schedules are built, using DSAMS, at the line level (or sub-line or delivery set level) and rolled-up to a case-level schedule. Payment schedules are prepared using IA pricing estimates and estimated dates for: LOA acceptance, LOA implementation, requisition initiation, contract awards, contractor payments, physical deliveries, and incurrence of personnel costs. Other information required to prepare the payment schedule include contractor termination schedules (used in the termination liability worksheet), lead times and/or availability, periods of performance, and disbursement histories for like-item cases or lines already implemented. Each deposit amount covers all costs estimated to be incurred on the purchaser's behalf during the payment period, plus a reserve to cover Termination Liability (for sales from procurement). Costs may include such items as anticipated deliveries of services and stock items, and progress payments on contracts. This information is needed at the line-level and must be provided by the IA to the DSCA (Case Writing Division-CWD) for payment schedule preparation.

In the event an amendment or modification to the basic LOA, the previous payment schedule assumptions must be revalidated and customer collections to trust fund disbursements should be compared. If necessary, the payment schedule must then be adjusted as appropriate in the amendment or modification. Amendments use the term "Due with Amendment Acceptance" vice Initial Deposit. [SAMM C9.9.1.5.1]

Initial Deposit

The initial deposit is a financial requirement collected from the customer at the time they accept the LOA. The initial deposit relates to the costs anticipated to be incurred from case acceptance (assumed for LOA calculation estimation purposes to be the LOA offer expiration date-OED) through the initial deposit period that the USG will be delivering/performing materials and/or services per the applicable LOA. SAMM C9.T12 (also shown in figure 12-3) defines the initial deposit time frame based on offer expiration / acceptance dates of LOAs. Determining the initial deposit period and the earliest quarterly payment date is based on the LOA's offer expiration date (OED)/expected implementation date [SAMM C9.T12]. For example, if the LOA OED (e.g., the BN-D-YCY LOA) is within the 11 September through 10 December date range, the LOA initial deposit should cover the forecast of expenditures from the LOA OED through 31 March of the next year (as shown in the figure 12-3). Any quarterly payments thereafter (i.e., subsequent to the initial deposit) should be sufficient to cover all costs and contingencies anticipated to be incurred by the IA on the FMS purchaser's behalf during the quarter immediately following the payment due date. For example, a purchaser's payment due on 15

March should provide funds for costs expected to be incurred for the period 1 April through 30 June. [FMR volume 15, chapter 4, section 040203 and SAMM C9.9.1]

**Figure 12-3
Determining Initial Deposit Period**

For anticipated offer expiration/ implementation date:	Earliest payment date shown in payment schedule is:	For costs to be incurred in:
11 Sep - 10 Dec	15 Mar	Apr - Jun
11 Dec - 10 Mar	15 Jun	Jul - Sep
11 Mar - 10 Jun	15 Sep	Oct - Dec
11 Jun - 10 Sep	15 Dec	Jan - Mar

What's the OED for case YCY? 30 Sep

The list below describes types of costs that can make up the initial deposit and any subsequent estimated quarterly payments [FMR volume 15, chapter 4, section 040205]:

- Anticipated materiel deliveries/services from procurement
- Anticipated materiel deliveries/services from stock
- Progress payments to defense contractors
- Authorized surcharges including the administrative surcharge {Note that in cases where the calculated administrative surcharge is greater than \$30,000, one half of the administrative surcharge is recouped as part of the initial deposit. The remaining half is recouped based on the dollar value of items or services delivered in each quarter. For cases where the calculated administrative surcharge is \$30,000 or less, the entire administrative surcharge value, as well as any Small Case Management Line value (if applicable), is recouped as part of the initial deposit.}
- Termination liability (TL) reserve
- Contractor holdback

Some of the terms used above deserve special comment:

- Progress payments are made to contractors or DoD industrial fund activities as work progresses under a contract or work order, based on costs incurred or percentage of completion, or a particular stage of completion, accomplished prior to actual delivery and acceptance of contract items or services.
- Contractor hold back is the amount earned by contractors or suppliers during the period but held back by the USG to ensure future performance of the contractor.
- Termination liability (TL) is the potential cost that the USG would be liable for if a particular FMS case is terminated prior to completion. It applies to any FMS case that has procurement contracts. TL reserve is the amount collected from a purchaser and held in escrow in anticipation of any liability that would accrue to the USG should a purchaser terminate a particular case or program prior to the normal completion of the contract. The reserve is not a constant amount and must be adjusted regularly as contracts are awarded, work progresses, payments are received, and deliveries are made. When a standby letter of credit applies (as described in the next paragraph), the payment schedule will be developed without TL.

Standby Letter of Credit

A Standby Letter of Credit (SBLC) may be used instead of Termination Liability (TL) to guarantee termination payments. FMS programs are not eligible to participate. The purchaser may request participation in the SBLC program. The purchaser's request(s) must be sent to DSCA in writing, and signed by an official authorized to accept the SBLC documents on behalf of the purchaser's government and/or organization. The purchaser must specify the bank(s) it wishes to use. The purchaser is responsible for paying all fees associated with the SBLC to the issuing bank. No fees can be capitalized or included in the dollar amount specified in the SBLC documents. The purchaser must sign the agreement specifying the terms and conditions in order for the associated SBLC to be implemented. The purchaser must notify DSCA (Business Operations Directorate), in writing, if it wishes to terminate the agreement with the bank(s).

DSCA is the beneficiary stated on the SBLC. It is also the focal point for SBLC issues and engages the DSCA Office of the General Counsel, USD(C), DFAS SCA, and the IAs, as appropriate, to ensure effective SBLC execution.

DSCA notifies the IA and the DSCA (Case Writing Division) when and if a country's SBLC is implemented. The notification includes a list of cases (or indicates that it applies to all cases) governed by the SBLC. DSCA's Case Writing Division and the IA ensure the TL is not included in the payment schedules for any of those applicable cases. If an SBLC is terminated, the payment schedule is revised to include TL. DSCA also notifies DFAS SCA and the purchaser.

A drawdown (sight draft) from the SBLC is a demand for payment from the SBLC bank. A sight draft may be completed by DSCA (after coordination and approval by the Director or Deputy Director, DSCA), and sent to the appropriate bank for any of the following reasons:

- The FMS purchaser notifies the USG, in writing, that it is terminating all or a portion of an FMS case.
- The USG notifies the FMS purchaser, in writing, that it is terminating a FMS case(s) or contract(s) relating to an FMS case.
- The USG is aware the SBLC is being either terminated or not extended beyond its expiration date and there are applicable unpaid termination charges.
- A contractor presents a bill to the USG for termination charges associated with an FMS case(s).
- The issuing and/or confirming bank falls below DSCA's acceptable eligibility thresholds.

The payment is remitted to the account specified on the sight draft. Upon receipt, DFAS SCA ensures the payment is credited to the FMS case(s) as directed on the wire transfer. DFAS SCA notifies DSCA of the deposit date and the FMS case(s) is credited within three business days of demand payment receipt.

Annual Case Reviews

FMR volume 15, chapter 4, section 040103C3, SAMM C6.5.4, and SAMM C16.2.3.1 require that all FMS cases be reviewed at least once annually (i.e., once per calendar year) per the following:

- Anniversary of basic case implementation
- Preparation for a formal review with the FMS customer
- Case value adjusts by ten (10) percent or more [SAMM C16.2.3.1]

Case reviews can also be done more frequently if needed. SAMM Table C6.T5 shows the normal frequency and timing of each type of review. When scheduling a review, holidays (purchaser and USG), weekends, and personnel changes (e.g., SCO, purchaser leadership) should be considered. Because FMS reviews for a specific purchaser or program often involve many of the same people, reviews should be consolidated whenever practical.

DSCA's Reconciliation and Closure Guide (RCG-SAMM appendix 7) provides the minimum review items that are required of a case and identifies at which point in the case life cycle each item must be reviewed. RCG figure A7.C2.F5 provides the minimum review items that, taken together, constitute the required annual review of each case. The RCG matrix also identifies how long in the case life cycle each item must be reviewed. RCG figures A7.C2.F6 and A7.C2.F7 are the guidelines and checklist derived from the matrix that documents that the review was performed. The case manager must sign and date a checklist documenting that he/she performed the review and this checklist shall become an official document within the applicable case file. Automation, to the extent possible, and electronic filing is both allowable and preferred whenever practical. Automated replacement for the annual case review process and documentation requirements must be approved by DSCA (Business Operations Directorate, Financial Policy and Analysis Division).

Tri-annual Reviews

Tri-annual reviews are an internal DoD control practice used to assess whether commitments and obligations recorded are bona fide needs of the appropriations charged. Tri-annual reviews apply to all DoD funding sources to include, but not limited to, FMS case funds. Funds holders, with assistance from supporting accounting offices, shall review dormant commitments, unliquidated obligations (ULO), accounts payable, and accounts receivable transactions for timeliness, accuracy, and completeness during each of the four-month periods of each fiscal year. The tri-annual review process is a very effective tool in supporting the case manager's case management and reconciliation responsibilities. Refer to DoD FMR, volume 3, chapter 8, section 0804 and SAMM C16.2.3.2 for additional policy information on the tri-annual reviews.

Payment Schedule Reviews and Revisions

Payment schedule updates are necessary to reflect revisions to delivery schedules, scope changes, pricing updates, actual contract award dates, contractor payment milestone revisions, etc. To determine whether an update is needed, payment schedule reviews occur at least annually as part of the case review and reconciliation process. Payment schedules must be evaluated for possible changes when a Modification or Amendment is processed. If the contract award date slips, the payment schedule must be adjusted by a Modification within thirty days of contract award. A new payment schedule should be furnished whenever there is a substantive change in payment requirements. [SAMM C9.9.3]

Anti-deficiency Act Violations and Adverse Financial Conditions Reports

For purposes of the Anti-deficiency Act, appropriated funds are not limited to those funds specifically appropriated by the Congress to federal agencies from the general fund of the U.S. Treasury. Funds available to agencies are considered appropriated, regardless of their source, if made available for collection and expenditure pursuant to specific statutory authority. In applying the Anti-deficiency Act, the FMS Trust Fund is considered to be, and is to be treated as, appropriated funds. Therefore, the Anti-deficiency Act applies to transactions involving the FMS Trust Fund. [FMR volume 15, chapter 3, section 0311]

Potential violations can occur under the FMS trust fund when:

- Issuing OA and/or awarding an FMS contract without a signed LOA
- Obligating or expending FMS case funds for an unauthorized purpose, including purposes not provided for by law

- Other violations may occur related to apportionments or indemnity clauses {Note: Additional information on potential violations of the Anti-deficiency Act is in FMR volume 14, chapter 2}.

Identifying and Reporting Violations on the Anti-deficiency Act

Detailed guidance for identifying and reporting violations under the Anti-deficiency Act is contained in FMR volume 14 (Administrative Control of Funds and Anti-deficiency Act Violations). Due to the complexities of provisions in the AECA, it is important to consult with appropriate legal counsel and comptroller officials on potential violations of the Anti-deficiency Act for FMS.

Time Limits of Security Cooperation Funds

The three major legal provisions that concern funds execution are the: Anti-deficiency Act, Misappropriation Act, and the Bona Fide Need Rule (also known as the “time statute”). Bona Fide Need rule (law) requires appropriated funds be used only for goods and services for which a need arises during the period of that appropriation’s availability for obligation.

An unexpired (or current) account is one where the appropriation balance is available for incurring obligations. An expired account is one where the appropriation balance is no longer available to incur new obligations. A closed/canceled account is one where by law, the appropriation balance is canceled and not available for obligation or expenditure for any purpose.

If the funds on a case are provided by the customer country or organization for purchase of LOA articles and/or services, there is typically no time limit on use of those funds unless stipulated by the purchaser. USG provided case funds, however, will typically have time limits on when they are authorized to be used. The balance of a fixed-term appropriation is available only for payment of expenses properly incurred during the period of availability or to complete contracts properly made and obligated within that period. [FMR volume 15, chapter 2, section 020102]. Foreign Military Financing (FMF) grant money for example has a nine year period to be deposited in the FMS Trust Fund account to be used on an implemented LOA. Once the FMF grant money is deposited into the FMS Trust Fund account (97-11X8242) those funds are considered expended. Other USG SC funds (e.g., 2282, ASFF, ITEF, etc.) typically have specific legal limits on when those funds can be obligated and expended. Refer to SAMM chapter 15, table 2 (BPC Programs and Authorities) for a complete listing of available BPC programs with their corresponding codes and authorities including obligation and expenditure requirements.

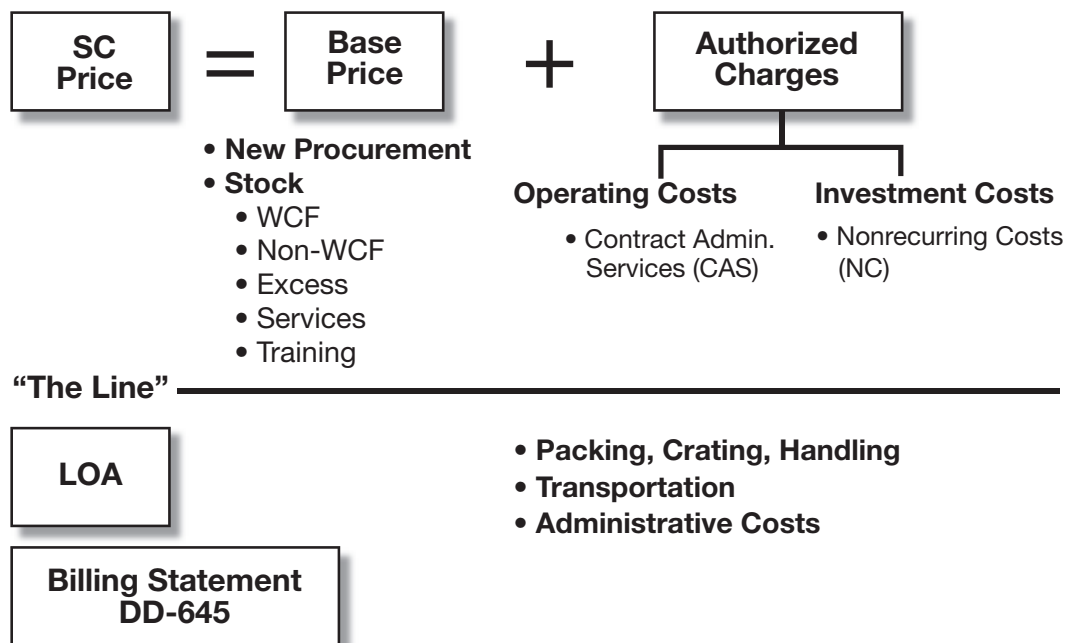

PRICING

The prices entered on a P&A or LOA are estimates of the expected costs of articles and/or services to be delivered sometime in the future. The objective of these estimates, developed using cost analysis techniques, is to provide the purchaser with the USG’s best effort prediction of a future cost. Prices entered into the billing system eventually document the prices of the article at the time it is delivered/performed from a contractor or DoD stock inventory. In the case of articles or services coming from new procurement, the initial prices reported will typically be those incurred for progress payments made to defense contractors on behalf of the purchaser. However, the exact final cost of major procurements may not be determined until all the contracts for all systems obtained under such procurements are complete. Consequently, estimates can be entered into the billing system to be replaced by the actual costs when they are determined. That is also often the case with DoD provided services due to the IA challenges in reconciling the applicable logistics and financial transactions in their computer execution systems. The important point is that the components and policies to determine an LOA material and/or service price should be the same whether entered on an LOA or entered into the billing system. The price on the LOA is an estimate of what the USG believes its cost will be. The price reported in the billing system will eventually document the actual cost incurred once that cost is known and documented.

Pricing Elements

Figure 12-4 illustrates the basic pricing concept used to structure and compute the price of an LOA material and/or service. The elements of the LOA material and/or service price can be combined into two major component categories: base price and authorized charges. The base price generally refers to the cost of the item or service, e.g., contract price, inventory price, services cost, training price, etc. The authorized charges on the other hand, relate to the application of a cost (often on a percentage or pro rata basis that is dependent to some degree on the value of a base price(s) or other pricing combinations) that the USG charges to recover total costs for the applicable services performed. In the following discussion, both of these categories will be addressed.

Figure 12-4
Price Formula

Base Price Computation

New Procurement

Defense articles and/or services procured for cash sales to an eligible foreign government or international agency, pursuant to AECA, Section 22, for delivery must be priced to recover the full contract cost to DoD. Costs may be revised for increases in labor and materials, or for other changes in production and procurement costs. The purchaser is obligated to pay any damages or costs that may accrue from the purchaser’s cancellation of the contract (termination liability). [FMR volume 15, chapter 7, section 0704 and figure 7-10]. The IA will price defense articles and services for “pseudo” LOA documents in accordance with the DoD Financial Management Regulation (FMR) and SAMM C15.3.3.

Stock Materiel Funded from the Defense Working Capital Fund (DWCF)

The DoD purchases most secondary items in DoD inventories through a revolving cost account categorized as a Defense Working Capital Fund (DWCF). Each MILDEP operates its own DWCF account, and the Defense Logistics Agency (DLA) operates a DoD-wide DWCF [FMR volume 11B, chapter 1, section 010101]. Continuing operations are funded by reimbursements received. The goal

for those DWCF accounts is to recoup the full retail costs of obtaining an item and maintaining it in the DoD inventory. The base selling price of DWCF articles to FMS purchasers must be determined at the time the article is dropped from inventory [FMR volume 15, chapter 7, section 070302.B]. Packing, Crating, and Handling (PC&H) costs and inland CONUS transportation costs (typically in FMS to the continental U.S. pickup points of the FMS customer's freight forwarder) are already included in the prices of DWCF item deliveries [FMR volume 15, chapter 7, section 0705].

A small percentage (typically MILDEP managed) of DoD-managed secondary items are not typically acquired from the DWCF accounts. Examples of those typically non-DWCF managed items include ammunition, CADs/PADs (cartridge/propellant activated devices), TRAP (tanks, racks, adapters, and pylons), classified items, COMSEC/crypto, publications, and maps/charts.

Non-DWCF DoD Stock Inventory

The base pricing and treatment of reimbursements for non-DWCF stock articles sold are dependent upon whether the item(s) being sold requires replacement. [FMR volume 15, chapter 7, section 070302C]

Not Replaced

When a determination is made that the item will not be replaced, the price of the item must be the most recent actual procurement cost of the series and model being sold, plus the cost of any modifications or improvements incorporated after production, and the applicable non-recurring (NC) recoupment charge. Reductions to the sale price may be made when there is an actual difference in utility or desirability among units of issue of an item due to age or condition. The cost of the last major overhaul or outfitting accomplished before the sale date is added to the calculated price and is not reduced for age or condition. The overhaul costs will be prorated over the interval between the last actual overhaul and the next scheduled overhaul. Examples for price computations are at FMR volume 15, chapter 7, figures 7-3 and 7-4 (overhaul).

Replaced

When an item is sold from the stocks of DoD and the item is intended to be replaced, the replacement may be either with an end item which is of identical type, model, and series designation (replacement-in-kind, e.g., sale of a C-130B and a purchase of a C-130B), a later series or modified version of the same basic model being sold (e.g., sale of C-130B and the purchase of a C-130E), or an acceptable substitute item that provides at least the same capability or readiness as the item being sold (e.g., sale of an M-48 tank and purchase of an M-60 tank). The price of the item to be replaced must be the best estimated cost of the replacement item available at the time the item is dropped from inventory, plus the nonrecurring recoupment charge of the item being sold, adjusted for the remaining service life of the item being sold. The final bill will utilize the best pricing information available if actual replacement procurement cost is not known. This must be the final cost to the purchaser regardless of the actual cost of final replacement procurement. [FMR volume 15, chapter 7, section 070302C.2]

Excess Defense Articles (EDA)

Excess defense articles (EDA) are items excess to the approved force acquisition level and approved force retention stock requirements of all DoD components. A determination of "excess" is made by DoD based on recommendation by the applicable DoD system or item manager. Any EDA transfers from DoD inventories are in an "as is, where is" condition which is defined in chapter 10 of this textbook. The cost of excess items is determined by computing and then using the highest of market, scrap, or fair value plus any applicable non-recurring (NC) and applicable overhaul charges. Military articles are not sold for less than scrap value. If the item is repaired, rehabilitated, or modified for transfer, this extra cost will be also applied to indicate the final price of the item. Fair value is based

on the applicable Federal Condition Code as shown in figure 12-5. The fair value is computed using the fair value rates associated with the Federal Condition Code of the asset multiplied by the established inventory price [FMR volume 15, chapter 7, section 070304]. If the IA proposes the price of materiel to be less than the 5 percent minimum threshold indicated in FMR table 7-2, or if they propose to waive the overhaul costs, a detailed justification must be sent to DSCA. If DSCA endorses the IA proposal, it will forward that package to OUSD(C) for final approval.

**Figure 12-5
Federal Condition Codes for EDA**

To calculate EDA fair value, determine the applicable percentage at the intersection of the EDA Supply Condition and Disposal Condition Codes and then multiply percentage by the established inventory price.				A	B	C	D	E	F	G	H	S
				SERVICEABLE				UNSERVICEABLE				
				Issuable without qualification	Issuable without qualification	Priority Issue	Test/Modification	Limited Restoration	Repairable	Incomplete	Condemned	Scrap
Disposal Condition Codes	1	Unused	Good	50%	30%	30%	30%					
	2		Fair	30%	20%	20%	20%					
	3		Poor	10%	10%	10%	10%					
	4	Used	Good	40%	30%	30%	30%					
	5		Fair	30%	20%	20%	20%					
	6		Poor	10%	10%	10%						
	7	Repairs Required	Good				20%	20%	20%	20%	10%	
	8		Fair				5%		10%		5%	
	9		Poor				5%		5%		5%	
	X	Salvage							5%	5%	5%	
	S	Scrap										

Personnel Services

Many FMS and BPC LOAs contain personnel support costs such as engineering services, configuration data management services, technical services, training team members, etc. These services must be priced to recover all USG costs and will be included as separate, well-defined lines on the LOAs. This section excludes personnel performing DoD training services as that will be discussed in the next section (Training Pricing). DoD personnel services LOA lines must be priced to recover not only the appropriate wages, but also all appropriate applicable entitlements. The base pricing for both civilians and military personnel performing these services include wages, acceleration factors, temporary duty/permanent change of station costs, and personnel support costs. When determining the pricing for personnel services, every attempt should be made to use actual costs. If actual cost data is not available, estimated pricing is acceptable. The costs must be substantiated by a reliable audit trail [FMR volume 15, chapter 7, section 0702].

SAMM table C9.T2 (Case-Related Manpower Functions and Funding Source Manpower Matrix) indicates which activities should be included as line items on the case (direct charges) and which activities are covered under the FMS Administrative Surcharge (indirect charges). For LOAs or case line items “accepted” after August 1, 2006, any program management services will be included on well-defined, services line items on the case.

Services performed by DoD civilian personnel must be priced at rates in effect at the time the services are performed. Civilian personnel salary tables are available at the Office of Personnel

Management (OPM) web site (<http://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/>). There are several components to civilian personnel pricing—including base salary, leave and holidays acceleration, civilian personnel fringe benefit rate, and the unfunded civilian retirement (UCR) factor. Base salary rates must be accelerated as discussed in the FMR volume 15, chapter 7, section 070202. The applicable Civilian Personnel Fringe Benefits are posted at the OSD Comptroller (<http://comptroller.defense.gov/>) website, and can be accessed via the “DoD Reimbursable Rates” link on that page. The notes within that link’s table identify which percentages should be used for Building Partner Capacity (BPC) and those that should be applied for FMS LOAs. The DSCA Policy Memo 13-29 was issued to clarify the appropriate pricing of civilian personnel costs applicable to both FMS and BPC cases as priced in DSAMS. The pricing principles apply regardless if the civilian pay is a stand-alone line or whether it is embedded into a unit cost.

Military personnel services must be priced using the composite standard pay rates current at the time services are performed. Current reimbursable rate tables are available at the OSD Comptroller web site (<http://comptroller.defense.gov/>) and can be accessed via the “DoD Reimbursable Rates” link on that page. Rates applicable to FMS are computed using the “Annual Rate Billable to Other Federal Agencies” plus the Medicare-Eligible Retiree Health Care (MERHC) accrual. Travel, per diem, living allowance payments, and other entitlements to DoD personnel working on FMS cases must be identical to the payments and entitlements of DoD personnel working on direct DoD mission assignments at similar locations [FMR volume 15, chapter 7, section 070205]. The FAA, Section 503(a)(3) permits the exclusion of salaries of members of the Armed Forces (other than Coast Guard) if the sales case for defense articles, services (including training), or for design and construction services is totally financed by MAP Merger or by non-repayable FMF. [FMR volume 15, chapter 7, section 070104.C.5]

Training Pricing

DoD tuition rates for training must be based on the costs of providing the training. There are several factors that impact the tuition rate for which an international student is eligible. The source of financing is one determinant (e.g., whether a country uses its national funds to purchase training or whether U.S. appropriated funds are used to purchase the training). Other factors include whether a country is a high-income country, whether it has signed a reciprocal training agreement with the U.S., and/or whether the country is concurrently in receipt of IMET. A general guide for pricing training is also addressed in FMR volume 15, chapter 7, table 7-3 and SAMM C10.14. Detailed instructions to be followed in developing the tuition rates are included in FMR volume 15, chapter 7, section 071002.

DoD tuition rates must be computed annually by the Military Departments and published in the Training Military Articles and Services List (T-MASL) which is accessible via the DoD Security Assistance Network (SAN). Approved rates typically remain constant for the year. Adjustments must be made only to correct significant errors in computation, change in syllabus, or major unanticipated increases or decreases in the cost of such items (e.g., fuel and salaries). The foreign country or purchaser must be billed for the actual time the student is in training. International students who audit a course must be charged the same price as enrolled students. Certain costs associated with support of international students and/or their dependents are considered to be a responsibility of the foreign government and are not included in the tuition rate for a training course(s). [FMR volume 15, chapter 7, section 071001.F]

The FAA and AECA prescribe a multi-tier tuition pricing structure for training provided under the USG SC programs. The present pricing structure for SC training provides for five separate tuition rates (A, B, C, D, and E) as noted in FMR volume 15, table 7-3, “Tuition Rate Pricing Structure” which is summarized in table 12-3.

Dedicated training programs (e.g., Euro-NATO Joint Jet Pilot Training Program, Euro-NATO Helicopter Pilot Training Program, PEACE CARVIN, PEACE FENGHUANG) must be priced in

accordance with the terms and conditions established via formal agreement between the IA and the recipient country/countries. While each program is different, generally accepted full cost pricing principles must be applied taking into consideration appropriate legislative authority and terms of the formal agreement. [FMR volume 15, chapter 7, section 071001.B.1]

When a special course is conducted by an Security Cooperation Team (SCT) or Security Assistance Team (SAT) away from the normal training institution, the services of the team must be treated as a service and priced in accordance with the FMR. All salary, travel, per diem, and allowances paid to members of the team established to conduct in-country training must be considered incremental costs. Exclude military pay and allowances as well as civilian unfunded retirement from the costs established for teams conducting in-country training fully financed by MAP Merger or FMF, or financed under the IMET program. [FMR volume 15, chapter 7, section 071001.B.2]

Table 12-3
Training Tuition Rates

RATES	RATE DESCRIPTION
A	Countries and organizations purchasing training via an FMS case and not eligible for one of the FMS pricing categories listed below are charged Rate A.
B	Countries with a ratified reciprocal pricing agreement with the USG that are purchasing training via an FMS case are charged Rate B. SAMM Table C10.T13 and C10.T14 lists the countries and effective dates of the reciprocal agreements. Note that some of these countries are also eligible for Rate C and/or Rate D.
C	Countries currently in receipt of IMET or designated as a high-income foreign country, in accordance with the FAA, Section 546(b) (Austria, Finland, the Republic of Korea, Singapore, and Spain) and purchasing training via an FMS case using their own national funds, are eligible for Rate C. DSCA (Business Operations Directorate) maintains the DSCA IMET Allocation Database System (DIADS) that identifies countries currently receiving IMET. Refer questions on a country's IMET status to DSCA (Business Operations Directorate).
D	Training on a case financed with U.S.-appropriated funds, receives Rate D. Training in this category is on cases financed with FMS Credit (non-repayable), or Building Partners Capacity programs. This rate is identical to Rate E except that the FMS administrative surcharge will be applied to it.
E	Training financed by the IMET appropriation is priced at Rate E.

Because of the shortage of available training quotas and the difficulty experienced by the MILDEPs in adjusting to changes in student input, DoD has instituted a penalty charge for no-shows and for late-notice cancellations. For certain dedicated (all international) and contract courses, a 100 percent penalty is charged for cancellation unless filled by another student. For all other courses, if the country requests cancellation or rescheduling less than sixty days prior to the course start date, the country's IMET program (or other grant program) or FMS case is charged 50 percent unless filled by another student. Policy exceptions to the preceding are documented in the SAMM reference. [FMR volume 15, chapter 7, section 071001.E and SAMM C10.15]

Authorized Charges

Nonrecurring Costs (NC)

Non-USG purchasers must pay for the value of DoD nonrecurring (NC) investment in the development and production of Major Defense Equipment (MDE), as required by law, unless an NC

recoupment charge waiver has been approved by the Director, DSCA who has been delegated the authority to waive NC costs on FMS sales. The decision on any waiver requires the concurrence of OUSD(C) and OUSD (AT&L). If an issue concerning the waiver request cannot be resolved, the Director, DSCA, must submit an official waiver request to the Deputy Secretary of Defense for final determination.

For FMS, an NC recoupment charge is applicable to all Major Defense Equipment (MDE). MDE is any item of Significant Military Equipment (SME) listed on the U.S. Munitions List having a DoD nonrecurring RDT&E cost accumulation of \$50 million or a total DoD production cost of more than \$200 million. The DoD approved listing of MDE with associated NC charges can be found in the SAMM, appendix 1 (Nonrecurring Cost Recoupment Charges for Major Defense Equipment). MILDEPS and defense agencies are required (per the FMR and the DODD 2140.02 (Recoupment of Nonrecurring Costs [NCs] on Sales of U.S. Items) to review approved NC recoupment charges on a biennial basis to determine if there has been a change in factors or assumptions used to compute an NC recoupment charge. When a recoupment charge is revised, the previous value is retained in the SAMM, appendix 1. Subsequent revisions to the pro rata charge must be applied to new LOAs and must not be retroactive. In instances where the initial rate has not yet been approved, DoD Components must provide for an estimated rate based on the most accurate information available to the DoD Component. The LOA must be modified to specify the subsequently approved rate and only that approved rate is to be billed.

When NC recoupment is applicable, the unit price on an LOA must include the specific recoupment charge. NC LOA charges may also include special recoupment costs incurred under FMS, paid by a foreign customer to develop a special feature or unique or joint requirement. Recoupment of these costs is required on all cash sales unless a specific waiver has been authorized. Per the AECA and Foreign Assistance Act (FAA), LOAs fully financed with Military Assistance Program (MAP) Merger or non-repayable FMF are not assessed a NC charge. The requirement for the USG to recover NC on direct commercial sales (DCS) was eliminated. NC does not apply to BPC cases [SAMM C9.T4, C9.6.3, and DoD FMR, volume 15, chapter 7, section 070305.A.

Contract Administration Services (CAS)

Contract administration services (CAS) charges are collected and charged by DoD to reimburse FMS and BPC costs incurred by DoD contracting organizations in accomplishing contract administration, quality control, and contract audit efforts on DoD procurement contracts. The CAS surcharge is added to the LOA blocks (4)(a) and (4)(b) unit and extended costs for all articles and services from procurement. DFAS SCA recovers the cost of CAS by applying a percentage surcharge to the delivery transactions reflecting disbursements to contractors for FMS and BPC procurements on which applicable CAS have not been waived. For pricing the LOA, the surcharge is based on the estimated contract cost; at billing, the surcharge will be applied to the actual contract cost. For the United States Army Corps of Engineers (USACE), quality assurance and inspections and some (e.g., post-contract award actions) of the contract administrative services costs are included in its supervision and administration costs charged to the case line, so separate additional CAS quality assurance and inspection and contract management do not apply to USACE cases or lines, but CAS contract audit still applies. PROS and U.S. Coast Guard (USCG) case procurement lines also have exceptions to normal CAS case and line charges. The contract administration surcharge is subject to waiver in whole or in part if reciprocal agreements exist. [SAMM C9.T4, C9.6.2, C9.T5, C9.T6, C9.T7 and FMR volume 15, chapter 7, section 070405] Some (e.g., pre-contract award by the IA) CAS is actually funded by the administrative funds as case standard level of service (SLS). SAMM C9.T2 documents those funding policies.

The CAS rate has changed and the rate that is applicable for a case depends upon when the basic LOA was implemented for that case. The CAS charges (unless waived) for cases where the basic LOA

was implemented on or after 01 December 2014 are listed in table 12-4. The complete listing of all applicable CAS rates (unless waived) are listed in SAMM C9.T4.

Table 12-4
Contract Administration Services (CAS) Charges

Contract Administration Services (CAS)	Applicable Percentage
Contract Administration/Management	0.50%
Quality Assurance and Inspection	0.50%
Contract Audit	0.20%
Overseas CAS	0.20%

Accessorial Costs

Accessorial costs represent potential applicable USG expenses incident to issues, sales, and transfers of materiel that are not included in the standard price or contract cost of materiel. Two primary accessorial costs are packing, crating and handling (PC&H) and transportation.

Packing, Crating, and Handling (PC&H)

PC&H costs are those DoD costs incurred for labor, materiel, or services in preparing non-Defense Working Capital Fund (DWCF) materiel for shipment from the storage or distribution point. PC&H costs do not apply to sales from procurement unless the item is processed through a DoD depot/distribution center. A PC&H rate of 3.5 percent of the unit price will be added to the selling price of materiel with a unit price of \$50,000 or less. An additional charge will be added equal to 1 percent of that portion of the selling price of materiel over \$50,000. For pricing blanket order lines on LOAs, PC&H (with exception of Excess items) is calculated as 3.5 percent on the line value. For excess items (i.e., EDA), PC&H is computed on the original acquisition value and not the reduced value of the excess materiel. The use of actual costs, when known, is highly encouraged. The LOA PC&H charges are typically (with EDA sometimes being the exception) shown on the LOA's block #9 in the Estimated Cost Summary. When provided as a unique service (e.g., EDA), these charges may be included as a separate line on the LOA. [SAMM C9.T4 and FMR volume 15, chapter 7, section 070502]

Transportation

The LOA transportation charges document the estimated cost to the USG of transporting FMS and BPC purchaser materiel using the Defense Transportation System (DTS) including Government Bill of Ladings (GBLs). Those LOA transportation costs include costs for labor, materiel, or services at ports of embarkation or debarkation). DWCF standard pricing includes transportation costs (for the first leg of transportation) within CONUS. If the first destination transportation is accomplished through GBLs, it must contain the DWCF funds cite. Shipping activities must clearly identify materiel as DWCF or non-DWCF to ensure the appropriate fund cite is issued for inland CONUS transportation. [SAMM C9.T4, SAMM appendix 2, and FMR volume 15, chapter 7, section 070503] Price transportation on LOAs as follows:

Above-the-Line Transportation Services:

- When LOA customers use the Defense Transportation System (DTS), an estimated amount is placed above-the-line to pay for transportation services that are not appropriate to be funded with below-the-line estimates. Examples of these transportation services include premium transportation such as Special Assignment Airlift Mission (SAAM) flights, securing a vessel for a one time only shipment, staging cost for consolidating shipments,

Radio-Frequency Identification tagging and tracking devices, special security (guards hired to escort the shipment), and other unique requirements.

- When a SAAM or some other form of dedicated premium transportation must be used to move the material purchased under an LOA, a separate transportation service line is included in the LOA. When expenditures are made for actual transportation, this line is adjusted to meet the full cost of this special transportation and a transportation account code needs to be supplied to the DoD service contract. [SAMM C7.12]
- Effective 01 June 2010 (per DSCA Policy Memorandum 10-32), all defense articles delivered by air transportation on or after this date for the Afghanistan program (FMS and FMS-like cases) will be charged as an “above-the-line” direct charge.
- If a LOA line item’s vendor/contractor is providing transportation services per the contract, the transportation costs may be included in the applicable LOA line item’s unit and total price.
- When shipments require containerization, storage in-transit, escorts, or have any other special transportation accessorial requirements; these special transportation accessorial costs are not included in the standard transportation percentages nor in the cost provided in the transportation cost look-up table. These charges are to be placed above-the-line and adjusted as needed to capture actual cost.

Below-the-Line Transportation Services:

- The Transportation Cost Look-Up Tables posted in the SAMM appendix 2 contain estimated actual transportation costs for items normally shipped via the Defense Transportation System (DTS). The data in the tables are applicable when customers use the DTS to transport item(s) that match the specific listed Naitonal/NATO Stock Numbers (NSN), and the plan is for the USG DTS to be responsible for transporting those item(s) to either Delivery Term Code 8 or 9. These “estimated actual” costs have been determined over time by the MILDEPS on based historical costs of shipping the identified items to DTC 8 and DTC 9 locations. Figure 12-6 provides a sample of the cost look-up table that is posted at the SAMM appendix 2.

**Figure 12-6
Transportation Cost Look-Up Table Example**

NSN		ITEM	CODE 8 ESTIMATED ACTUAL TOTAL	CODE 9 ESTIMATED ACTUAL TOTAL
APACHE				
1615-01-252-6376	TRANSMISSION		\$1,018	\$18,903
1615-01-306-6948	HEAD, ROTARY WING		\$1,104	\$27,955
1615-01-310-4978	BLADE, ROTARY WING		\$1,027	\$10,447
1615-01-273-7608	SERVOCYLINDER		\$834	\$1,731
2835-01-172-6200	ENGINE, GAS TURBINE		\$970	\$4,587
ATACMS				
1427-01-274-3904	GUIDED MSL AND LAUNCH POD ASSEMBLY, M39		\$1,410	\$48,567
1427-01-445-3758	GUIDED MSL AND LAUNCH POD ASSEMBLY		\$1,417	\$51,499
1427-01-494-1457	GUIDED MSL AND LAUNCH POD ASSEMBLY, M39A1		\$1,410	\$46,849

- When customers use the DTS and either an ‘above-the-line’ charge or the Transportation Cost Look-Up Tables are not applicable, a Delivery Term Code (DTC) percentage is applied to the line to compute an estimated amount for transportation costs on the LOA.

DTC percentages (refer to figure 12-7) are based on the mode of transportation provided (e.g., port-to-port, depot-to-in-country destination) and the rate area where articles are being delivered.

- ◇ For defined order lines, the applicable DTC percent is charged on the LOA for the first \$10,000 in unit cost, and then 25 percent of the DTC percent for the portion of the unit cost that exceeds \$10,000.
- ◇ For blanket order lines, the applicable DTC percent is charged on the LOA for the total line value.

Figure 12-7
DTS and TBC Percentage Rates

Rate Area	DTC 4 Point of Origin (TBC D)	DTC 2 Staging (TBC A, B, E)	DTC 5 CONUS Port of Embarkation (TBC A, B, E)	DTC 8 DoD CONUS Aboard Vessel/ACFT (TBC H, U)	DTC 9 Point of Debarkation Discharged (TBC C, V)	DTC 7 OCONUS Inland Destination (TBC G, Y)
1	0.00%	0.00%/3.75%	0.00%/3.75%	2.50%/6.25%	7.50%/11.25%	10.50%/14.25%
2	0.00%	0.00%/3.75%	0.00%/3.75%	2.50%/6.25%	15.50%/19.25%	18.50%/22.25%

Notes:

1. Rates documented in SAMM C9 table C9.T4a (Delivery Term Codes and Percentages) per FMR Volume 15, chapter 7, section 070503 (Transportation).
 2. Rate Area 1 includes Europe, Hawaii, Latin America (Central America and Caribbean Basin, and Mediterranean Ports).
 3. Rate Area 2 includes Newfoundland, Labrador, Thule, Iceland, South America (East and West coasts), Far East, African Ports (other than Mediterranean), and Near East.
 4. For DTCs with multiple percentages, the first percentage listed applies to DWCF material while the second percentage applies to material other than DWCF.
 5. Refer to ISCS 'Red' book appendix H-J and FMR Volume 15, chapter 8, for additional Transportation Bill Code (TBC) definitions and information.
 6. Alphabetic Delivery Term Codes (DTCs) are "round-trip" and are used for material returns (e.g., material repairs). Those alphabetic DTCs are defined in the ISCS Green Book chapter 11 and Red book appendix F.
 7. Delivery Term Codes 3 and 6 were eliminated in 2010 and should not be used when pricing LOAs.
- Delivery Term Codes (DTCs) for return of repaired materiel are documented in the FMR volume 15, chapter 8, table 8-38, and in chapter 11 of this textbook, "Security Cooperation Transportation Policy." Report the return of repaired materiel using Transportation Bill Code (TBC) "L" per FMR volume 15, chapter 8, section 080402.H.4.b.
 - A Transportation Bill Code (TBC), if used, overrides the DTC for both blanket and defined order line entries. TBCs are used to bill FMS purchasers for "below-the-line" transportation costs and can be used for multiple purposes including, if the actual method of transportation is different than that identified by the DTC. The list of TBCs is documented in the FMR volume 15, chapter 8, section 080402Q, table 8-48, and in the ISCS *Security Cooperation Billing Handbook*, (often referred to as the 'Red' book), appendix H.
 - The TBC pricing percentages to be used for "Transportation Charges Based on Transportation Bill Codes for Inventory Items Shipped by DWCF" are documented in the FMR volume 15, chapter 8, table 8-49, and the ISCS 'Red' (Billing) book Appendix I.

- The TBC pricing percentages to be used for “Transportation Charges Based on Transportation Bill Codes for Inventory Items Not Shipped by DWCF” are documented in the FMR volume 15, chapter 8, table 8-50, and the ISCS ‘Red’ (Billing) book Appendix J.
- For excess items, transportation costs are computed on the original acquisition value and not the excess materiel’s reduced value. The use of actual costs, when known, is highly encouraged.
- The transportation below-the line costs are shown on the LOA’s block eleven (11) in the Estimated Cost Summary section.

Administrative Charges

The Administrative surcharge is collected to cover the USG costs of administering (including the Standard Level of Service as defined in the SAMM C9.T2) FMS and “FMS-like” (i.e., BPC) programs. It is included as a percentage of applicable line items as a below-the-line charge on the LOA and the quarterly bill. It is applied to the selling price with the exception of program management lines, small case management lines (SCML), and approved waivers (as discussed in the Training section of this chapter and the following waiver paragraphs). The administrative surcharge percentage is subject to change without prior approval of the purchaser. The administrative surcharge applicable to each line on the LOA is to be specified as a note to each LOA document. For cost increases within the scope of the LOA, modifications retain the administrative rates associated with the lines modified. When an amendment adds a new line to an existing case, the administrative surcharge rate in effect at that time is applied. For any case that is closed, the USG will retain funds to pay for estimated administrative costs associated with the case, even if no articles or services have been delivered (\$0 delivered value). The “Administrative Charge” below-the line costs are shown on the LOA’s block ten in the Estimated Cost Summary.

Costs associated with administering the FMS program must always be paid and/or collected (AECA, section 21(e)(2)). If a waiver of the FMS Administrative Surcharge for the purchaser is approved in one of the circumstances described below, it must still be recouped from another funding source.

Waiver by the Implementing Agency

FMR volume 15, chapter 7, and AECA, Section 21(e)(2) allow the IA to waive or reduce FMS Administrative Surcharges that should be assessed to the purchaser on the LOA as long as the IA obligates its own operation and maintenance appropriations to pay the FMS Administrative Surcharge Account the waived and/or reduced amount. [FMR volume 15, chapter 7, section 070605]

Waiver of Administrative Surcharges for NATO Support Agency (NSPA) FMS Programs

AECA, section 21(e)(3), allows the waiver of FMS Administrative Surcharges for NSPA (formerly known as NAMSA) programs under very specific circumstances. Waiver of FMS Administrative Surcharges on these cases is not retroactive; only LOAs implemented after October 1, 1988 are eligible for consideration. The waiver value includes the calculated FMS Administrative Surcharge amount and any SCML value included on the LOA. Only NSPA LOAs in support of weapon system partnership agreements or NATO Supreme Headquarters Allied Powers, Europe (SHAPE) projects (i.e., common-funded projects supported by allocated credits from NATO bodies or by host nations with NATO infrastructure funds) qualify for FMS Administrative Surcharge waivers. FMS Administrative Surcharges waived under this program must be reimbursed to the FMS Administrative Surcharge Account from Major Force Program (MFP) 10 funds controlled by the U.S. mission to NATO. The specific procedures are documented in the SAMM. [SAMM C9.6.1.1]

Percentage Rates

The following is a list of the Administrative Surcharge rates that are included as a percentage of the applicable LOA line items as a below-the-line charge on the LOA [SAMM C9.T4].

- 3.5 percent for both standard and nonstandard articles/services for LOA lines accepted on or after November 1, 2012
- 3.8 percent for both standard and nonstandard articles/services for LOA lines accepted on or after August 1, 2006 and before November 1, 2012
- 2.5 percent for standard articles/services for LOA lines implemented on or after June 1, 1999 and before August 1, 2006
- 3.0 percent for standard articles/services for LOA lines implemented on or after October 1, 1977 and before June 1, 1999
- 2.0 percent for cases signed prior to October 1, 1977
- 5 percent for non-standard articles/services for LOA lines for non-standard items implemented before August 1, 2006
- 5 percent for Foreign Military Sales Order (FMSO) I cases

Other Cost Recovery Charges

In addition to the above Direct (i.e., Above-the-Line) and Indirect (i.e., Below-the-Line) charges, the following are other authorized charges that can be included on LOAs and bills to recover the full cost of the USG providing articles and/or services [SAMM C9.T4]:

Royalty

Incremental payments for the use of intellectual property that is subject to contractor proprietary rights restrictions and are included in the pricing of the item. Prior to January 1, 1998, charges for Technical Data Package (TDP) usage were included as a separate line item on the LOA but were discontinued for cases implemented on or after January 1, 1998 for U.S.-owned TDPs that are not subject to contractor proprietary rights restrictions. For BPC cases, apply only to the extent that the cost is included in the contract. [SAMM C9.T4]

Staging

Costs for the staging of materiel in CONUS DoD (non-DWCF owned/operated) facilities are additional to Defense Transportation System costs, and a three percent staging charge is applicable, if DSCA has authorized below-the-line recoupment of staging. DWCF activities must bill actual costs incurred as an above-the-line service. Normally, the actual costs of staging must be recovered as part of an above-the-line service charge. Such charges must not be duplicative of any other accessorial cost. When non-excess materiel is supplied from DoD storage points located OCONUS, the applicable rates must be charged as a prepositioning cost. [FMR volume 15, chapter 7, section 070504]

Prepositioning

Supply distribution costs incurred by locations outside the U.S. in anticipation of support to other authorized purchasers are included as a separate line item on the LOA. These costs are applicable when shipments are made from overseas storage and distribution points. No positioning costs shall be assessed on “long supply stocks.” [SAMM C9.T4]

Foreign Military Sales Order Storage (FMSO)

Cost of storing on-hand Cooperative Logistics Supply Support Agreement (CLSSA) inventory, when applicable, is included in the line item value on the FMSO I LOA. The charged rate is 1.5 percent annually on value of stored assets, unless a separate fee is negotiated with the storage facility or 0.125 percent monthly on value of stored assets, unless a separate fee is negotiated with the storage facility. There is no annual inventory maintenance and storage charge for DWCF items for CLSSAs, as the DWCF standard (stabilized) price recoups all costs. For non-DWCF items, storage fees must be charged based on the on-hand portion of the FMSO I. The annual storage fee is 1.5 percent. For cases not remaining open a full year, a fee of .125 percent a month must be charged. [FMR volume 15, chapter 7, section 070704, and SAMM C9.T4]

Storage (Other)

Costs applicable to storage of purchaser-owned articles include the functions of receiving, care and preservation, set assembly and related activities, and overhead operations (such as re-warehousing, maintenance of operating equipment, physical inventories, and cleaning areas.) Storage charges are applicable to the non-DWCF on-hand portion of FMSO I cases, to cases on which DoD is ready to deliver applicable items but has been requested by the purchaser to delay delivery, and to cases on which DoD cannot deliver due to legal or policy restrictions. Charges commence 15 days following the date of availability (there is no annual inventory maintenance and storage charge for DWCF items for CLSSAs, as the DWCF standard (stabilized) price recoups all costs). A uniform DoD annual rate of 1.5 percent or .125 percent monthly of the average monthly value of purchaser-owned materiel will be charged to applicable FMS cases to recover an activity's storage cost unless a separate charge is negotiated with the storage facility. A separate line on the LOA(s) should capture the storage-related costs. If this line did not previously exist, it can be added via an LOA modification. [FMR volume 15, chapter 7, section 070801, SAMM C9.T4]

Logistic Support Charge (LSC)

Effective 1 October 2007, the 3.1 percent logistic support charge (LSC) was eliminated. This includes both application to a new LOA and items delivery reported after that date even if they were originally priced to include the charge. [SAMM C9.T4]

BILLING

Payments into the FMS Trust Fund, other than initial deposits, are based on bills (Billing Statement, DD Form 645, or Special Billing Arrangement (SBA). DFAS SCA sends the DD Form 645 to the purchaser quarterly. Under DSCA's oversight, DFAS SCA ensures that sufficient cash is available from the purchaser to cover accrued expenditures, costs to be incurred during the remainder of the current quarter, and costs to be incurred during the next quarter (e.g., contractor progress payments, contractor holdbacks, potential termination charges, and deliveries from DoD inventories). DD Form 645-based billings are the amount shown on the current case payment schedule or the quarterly forecast of the financial requirements accompanying the DD Form 645, bill, whichever is greater. The billing, not the payment schedule, contains the required payment amount. IAs should refer billing problems and questions to DFAS SCA. If a purchaser has an SBA, total expenditures for the forthcoming billing period are subtracted from total available cash resources to determine the billing amount. SBAs override Column 14 (Amount Due and Payable) of the DD Form 645. SBAs are issued by either the DSCA or DFAS SCA, and are managed at the country level unless an exception has been granted by the DSCA. [SAMM C9.10.2]

The AECA sections 21 and 22 provide the legal basis for FMS billing policies and procedures. LOA case billing involves many actions, but can be viewed as one of two processes. First, the agency provides a commodity or service, from either DoD stock or contractual sources, and then bills the

customer's or program's trust fund account managed by DFAS SCA via a delivery/performance report transaction. Second, DFAS SCA sends the purchaser the DD Form 645 Billing Statement.

Delivery / Performance Transaction Reports

The DoD components report deliveries of materiel and services, contractor progress payments, and other related costs to DFAS SCA to obtain reimbursement or to report performance under an allotment of FMS Trust Fund budget authority. IAs shall report accrued expenditures (work in process [WIP]) and physical deliveries to DFAS SCA within thirty days of occurrence (date of shipment or performance) through the billing and reporting procedures prescribed in the FMR via a delivery transaction [FMR volume 15, chapter 8, section 080401]. The delivery transaction prompts liquidation of customer funds collected in advance and maintained in the FMS Trust Fund. The complete listing of the delivery transaction positions and reporting codes is documented in the FMR volume 15, chapter 8, section 080402. Some of the significant delivery transaction information includes the following:

- Routing Identifier Codes (RICs)
- Price Code (e.g., “E” for estimated, “A” for actual costs, etc.)
- Stock or Part Number or Supply Discrepancy Report (SDR) Response
- Quantity Delivered
- Document Number (discussed in the ISCS logistics lessons and Green Book chapters)
- Case Designator
- Mode of Shipment
- Delivery Source Code (DSC)
- Reimbursement Code
- Transportation Bill Code (TBC)
- Date Shipped/Services Performed
- Amount Delivered / Extended Value
- LOA line item to which the report is applicable

The delivery transactions are submitted by the IAs and are received by DFAS SCA. Most of those reports are automatically provided to DFAS SCA by the applicable DoD and IA logistics and financial systems. Other transactions (especially services, major end items, and training) may require manual inputs by the IAs in their applicable execution computer information systems. The delivery transaction provides data enabling DFAS SCA, via the Defense Integrated Financial System (DIFS), to compute and bill customers for accrued expenditures including the application of various charges, such as administration, contract administration, PC&H, transportation, etc.

The delivery reporting transaction identifies accrued MILDEP/IA LOA expenditures for work in process and physical deliveries of inventory/new procurement articles and services. Based on the data contained in the delivery transaction, DFAS SCA will compute applicable surcharges and report the transactions to the purchaser through the delivery listing attachment to the DD Form 645 Billing Statement. There is a significant correlation between the codes and data that are entered in the Military Standard Requisition (per the MILSTRIP procedures) and the subsequent delivery reporting transaction. A Delivery Reporting Transaction example is shown in figure 12-8. FMR volume 15,

chapter 8, section 080402 provides additional details on the delivery transaction delivery reporting codes. The following paragraphs highlight some of the significant delivery reporting codes.

Accurate and timely performance reporting is essential to LOA financial management. For example, the Transaction Code (record position #2) identifies the type of transaction (e.g. delivery of articles or services, work in progress, etc.). The Monitor Code (record position #3), Routing Identifier Code (record positions #4-6) and Reimbursement Code (record position #58) identifies the activity to which the case is assigned for action, shipping depot or activity performing the service and the activity which is to be reimbursed. An “E” in transaction Price Code (record position #7) advises the customer that delivery is at an estimated price and “A,” actual costs, will be reported at a later date.

The delivery term code (DTC) (record position #34) indicates the responsibility, DoD or purchaser, for transportation of the articles. For example, DTC “8” advises the purchaser that the DoD planned to transport the article(s) to a continental U.S. (CONUS) port of embarkation (POE) and provide loading, handling, and storage aboard a vessel at the POE. Transaction position 35, type of assistance identifies the supply source, type of sale or type of assistance, such as sale of DoD inventory or services, a cash sale from procurement, a shipment from a customer’s supply support arrangement.

Figure 12-8
Delivery Reporting Transaction Example

CARD CODE						PRICE C CODE	STOCK NUMBER / PART NUMBER or SDR RESPONSE															UNIT OF ISSUE	QUANTITY DELIVERED					DOCUMENT NUMBER

0	1	N	B	Z	2	U	R	K	F				9	A	B	A	R	G	1	4	0	1	2	9	0	1	2	0	5	5	0	0	0	0	0	0	2		

The Delivery Source Code (DSC) (record positions #55 and 56) provides an audit trail between performance and the pricing of the LOA. The DSC is also used by DFAS SCA to recognize DoD earnings for:

- Administration
- PC&H
- Contract administration services
- Certain transportation charges

For example, a DSC beginning with the alpha “A” indicates delivery of materiel from DoD inventory, and a DSC beginning with the alpha “D” indicates work in process on FMS customer procurements and deliveries from procurement.

The complete listing and definitions of the authorized Delivery Source Codes are documented in the FMR volume 15, chapter 8, section 080402.N, in the *ISCS Security Cooperation Billing Handbook* (‘Red’ book) appendix Q and are reprinted in this book as attachment 12-1 to this chapter.

The financial actions that DFAS SCA will take is based on the IA reported Delivery Source Code (DSC) for each delivery transaction that is reported. The complete Surcharge Matrix for each the authorized Delivery Source Codes (DSCs) is documented in the FMR volume 15, chapter 8, table 8-40, the *ISCS Security Cooperation Billing Handbook* (‘Red’ book), appendix Q, and is reprinted in this book as attachment 12-2 to this chapter.

The transportation bill code (TBC) (record position #59), as discussed previously in the Transportation Pricing section of this book, is a very important code. It is used by DFAS SCA to recognize DoD earnings for transportation of materiel. If this position is left blank, DFAS SCA will compute transportation costs using the DTC previously discussed.

The transaction Amount Delivered /Extended Value (record positions #67-75) represents the total dollar value of the delivery transaction report. DFAS SCA will divide this value by the quantity shown in transaction positions 25-29 to determine the unit price as reported in the delivery listing to the purchaser.

Errors in the delivery reporting transactions codes can, and do occur. Those errors cause serious difficulties in the proper billing of purchasers and reimbursement of costs. Delays in submission of delivery transaction reports by the MILDEPs/IAs can also cause multiple issues including: late reporting of transactions to purchasers, the erroneous appearance of excessively large purchaser trust fund balances, and other related problems.

The delivery transaction reports are the source documents for the detailed entries which appear in the Delivery Listing that accompanies each DD Form 645 Billing Statement.

DFAS SCA Delivery / Performance Reporting Feedback to Implementing Agencies

As discussed in the previous Delivery Transactions section, IAs shall report the cost of DoD services, inventory items, and new procurement to DFAS SCA using delivery reports, or automated equivalents, through the FMS Integrated Control System (FICS) delivery transaction. DFAS SCA shall pay earned reimbursements included in such reports within twenty working days from the date of receipt. If a cash flow problem precludes payment, DFAS SCA shall issue immediate notification to the Director, DSCA, and to OUSD(C). The Director, DSCA, shall notify IAs to suspend further deliveries of DoD stocks or performance of DoD services unless a determination has been made that it is in the national interest for billings to be dated and issued upon delivery or performance, with payment due in sixty days. DFAS SCA provides several products to the IAs to assist in reconciling their accounts. The following is a list of selected DFAS SCA products and some of the data provided by each product. DFAS SCA normally provides these products on electronic media to the IAs. [FMR volume 15, chapter 8, section 080801]

FMS Command Pay List: DFAS SCA provides reporting activities with a monthly FMS Command Pay List that identifies the total amount of WIP or deliveries charged to FMS cases in the current reporting period, excluding accounts payable. The amount includes the delivery transactions submitted by the reporting activity, less accounts payable and rejected items, and additional charges mechanically computed by DFAS SCA. The last line of the Command Pay List, “Total Reimbursable to This Payee,” should equal the amount received by the payee.

FMS Detail Delivery Feedback List: The FMS Detail Delivery Feedback List is attached to the Command Pay List and identifies the delivery transactions submitted by reporting activities and processed by DFAS SCA for reimbursement or reporting to the FMS purchaser.

FMS Implementing Agency Performance Report Transaction Register: DFAS SCA provides this five (5) part report for IAs to use in reconciling their reported deliveries to the deliveries processed by DFAS SCA. The register also contains transactions submitted by the IA that could not be processed by DFAS SCA because of invalid data and/or suspected problem areas, information on transactions input by DFAS SCA on the IA’s behalf, transactions modified by DFAS SCA, and transactions deleted by DFAS SCA.

Foreign Military Sales Accounts Payable List: This report indicates transactions delivery reported by the IAs, but not paid to the reporting activity because the purchaser’s funds were frozen, or the purchaser did not have enough cash available, or the amount of credit deliveries outweighed the debits. The list also contains a total of all transactions that are reimbursable and non-reimbursable to the reporting activity.

Foreign Military Sales Billing Cycle

DFAS SCA issues a DD Form 645 Billing Statement (with applicable attachments) to customers for LOA costs related to defense articles, services, and training. After the customer accepts the offer and provides DFAS SCA with signed copies of the LOA and the applicable initial deposit, DFAS SCA updates DIFS with applicable LOA data. The case is implemented in DIFS and is then prepared to receive IA delivery transactions. The initial deposit accompanying most FMS cases provides sufficient cash to cover disbursements from the time the case is implemented until availability of funds from the first billing payment due date.

Billing statements are prepared and forwarded to the purchaser on a quarterly basis (i.e., for quarters ending 31 December, 31 March, 30 June, and 30 September) [SAMM C9.T16]. This FMS billing time line cycle (depicted in figure 12-9) must be taken into consideration during the computation of the initial deposit period and any quarterly payments thereafter.

**Figure 12-9
FMS Billing Time Line**

Completed Work Period/ Quarter	Projected Mailing Date	Payment Due to DFAS SCA	Planned Future Work Period/ Quarter
01 Oct - 31 Dec	15 January	15 March	01 Apr - 30 Jun
01 Jan - 31 Mar	15 April	15 June	01 Jul - 30 Sep
01 Apr - 30 Jun	15 July	15 September	01 Oct - 31 Dec
01 Jul - 30 Sep	15 October	15 December	01 Jan - 31 Mar

The payment dates shown on the payment schedules must be compatible with the billing cycle.

Foreign Military Sales Billing Statement

The FMS Billing Statement, DD Form 645 (see example in figure 12-10) is prepared by DFAS–SCA. In the absence of a special billing arrangement, the FMS Billing Statement represents the USG’s official claim for payment to the purchaser for the articles and/or services agreed to on the LOA. It also furnishes an accounting to the purchaser for LOA costs incurred to-date. In addition to identifying deliveries or performance of services made on the purchaser’s case, the DD Form 645 also reflects the forecasted costs which relate to the next quarter’s financial requirements on that same case. These forecasted costs may include anticipated progress payments, contractor holdback, TL reserve, accrued and future deliveries, and associated costs (e.g. NC, CAS, administrative/accessorial, etc.). For example, the DD Form 645 for the period ending 31 December would contain delivery transaction data provided to DFAS SCA in October, November, and December and a forecasted financial requirement for April, May and June. The 15 March payment due date shown in the figure 12-10, DD Form 645 example would also be the same payment date as contained in the estimated payment schedule of the applicable implemented LOA version. [FMR volume 15, chapter 8, section 080204 and table 8-1, and the ISCS ‘Red’ book chapter 3]

DD Form 645 Supporting Documentation

In addition to the DD Form 645, the purchaser is provided certain attachments, as applicable, which contain more detailed information. The DD Form 645 supporting attachments include: (1) FMS Delivery Listing, (2) FMS Reply Listing to Customer Requests for Adjustments, (3) FMS financial forecast, (4) holding account statement, and the (5) accelerated case closure suspense account statement. Each of these documents is explained in greater detail in the following paragraphs.

Foreign Military Sales Delivery Listing

A delivery listing (see example in figure 12-11) is prepared in support of entries to the DD Form 645 column 9, “Current Period Delivery Costs.” The delivery listing is an itemized listing of all items physically delivered and services performed during the reporting period. It is cross referenced to specific document numbers and allows purchasers to validate receipt of the materiel or services. The delivery listing is sorted by country case, line, Delivery Source Code (DSC), and then the accounting date. The meanings of the DD Form 645 entries are documented in the FMR volume 15, chapter 8, section 080204, table 8-2, and ISCS ‘Red’ book, (*Security Cooperation Billing Handbook*) chapter 4].

Foreign Military Sales (FMS) Reply Listing to Customer Requests for Adjustments

DFAS SCA provides a consolidated listing of the actions taken in response to Supply Discrepancy Reports (SDRs), entitled “FMS Reply Listing to Purchaser Requests for Adjustments” (see example in figure 12-12). All responses to SDRs shall be listed separately for each country and case. The Reply Listing is prepared in the same basic sequence as the billing statement and FMS delivery listing. The Adjustment Reply Code (ARC) documents the USG decision/action for the purchaser submitted SDR. The meaning of those codes is listed in the FMR volume 15, chapter 8, tables 8-10 through 8-14, and the ISCS ‘Red’ book appendix P.

Foreign Military Sales Financial Forecast

The financial forecast reflects forecast amounts of payments due, by quarter, for up to nineteen quarters of an FMS case. It essentially portrays the same information as the LOA estimated payment schedule [ISCS ‘Red’ book chapter 5].

Holding Account Statement

Discussed earlier in this chapter, DFAS SCA maintains holding account(s). The FMS customer may request DFAS SCA to draw upon its country holding account(s) for transfers to specific cases as a need arises. The holding account balances are not included in the totals of the DD Form 645. Separate holding account statements (see example in figure 12-13), are provided to the country showing deposits and withdrawals to the holding account(s) and is considered an off-line billing statement. The FMS customer must advise DFAS SCA of its desires relative to the controls over holding account transactions. For example, DFAS SCA needs to know if the customer desires automatic refunds, or if the customer wants to request refunds on a case-by-case basis [ISCS ‘Red’ book chapter 7].

Figure 12-13
Holding Account Statement Example

BANDARIA HOLDING ACCOUNT: BN-B-1BB FOR QUARTER ENDING: DECEMBER 31, 2008 CASH ACCOUNT FOR SALES TO BANDARIA ARMY				
DATE	DETAIL	DEPOSITS	WITHDRAWALS	BALANCE
30-Sep-08	BALANCE BROUGHT FORWARD			\$3,000.00
25-Oct-08	Funds transferred to BN-B-1BD Holding Account		\$200.00	
14-Nov-08	Excess funds from closed case P-JAC	\$90.00		
29-Dec-08	Cross-leveling transactions per letter, Embassy of Bandaria, 15 SEP 06 from cases: B-KAA D-KAB	\$50.00 \$75.00		
29-Dec-08	Cross-leveling transactions per letter, Embassy of Bandaria, 15 SEP 06 to cases: D-KBU D-KAW		\$100.00 \$25.00	
31-Dec-08	ENDING BALANCE			\$2,890.00

Holding account identification is a three digit alpha-numeric code. The first digit, a numeric code, describes the type of funds in the holding account as follows:

Table 12-5
Holding Account Codes

Numeric Code	Type of Funds
0	Interest bearing account
1	Regular FMS payments by purchaser
2	MAP funds (nonrefundable to FMS customer)
3	Third country recoupments
4	Buybacks
5	FMS credit funds (nonrefundable to FMS customer)
6	Worldwide Warehouse Redistribution Services (WWRS)
7	Unliquidated obligation (ULO) accelerated case closure procedures (ACCP) participants
8	Supply Discrepancy Report (SDR) transportation reimbursement

The second digit, an alpha code, identifies the U.S. implementing agency, and the third digit, also an alpha code, identifies the purchaser's in-country service. For example, a holding account for regular FMS payments for U.S. Army-managed cases with the Bandarian Army would be coded as 1BB. In some instances, the alpha codes could be labeled with the letter "Q" indicating that the customer has decided to consolidate all holding account funds at the country level.

Accelerated Case Closure Suspense Account Statement

For those countries participating in accelerated case closure procedures, DFAS SCA must record the case's estimated Unliquidated Obligation (ULO) value in a summary account entitled "Case Closure Suspense Account" (CCSA). A statement of the country's CCSA (see example in figure 12-14), will be provided with each quarterly bill. This account statement is similar to the holding account statement in that it summarizes activity, by case, for the current quarter. The statement also shows the previous and current quarter balances for the account. [FMR volume 15, chapter 3, section 030902 and the ISCS 'Red' book chapter 8]

Cross-Leveling

Cross-leveling is an accounting technique by which DFAS SCA transfers funds from one FMS case to another for the same country. This transfer permits the FMS purchaser to minimize payments due on a billing by fully utilizing all funds previously paid on FMS cases. There are two methods through which cross leveling may be accomplished. In the first method, the customer conducts a cash analysis and, in a letter (usually with a payment), requests DFAS SCA make specific cash transfers among designated FMS cases. The second method authorizes automatic cross-leveling between cases based upon case needs. In this method, there must be detailed written agreement between DFAS SCA and the FMS customer to document the transaction authorization(s). In order to provide the FMS

customer with a complete record of cross-leveling transactions, the transfer of excess cash is processed to the country holding account and then withdrawn from the holding account to be applied to a case requiring payment. Examples of “Cross-Leveling” transactions can be seen in the previously presented holding account statement example (figure 12-13).

Special Billing

A Special Billing Arrangement (SBA) is an alternative to the FMS Billing Statement (DD Form 645) that otherwise serves as an official USG claim for payment to the FMS purchaser. In much the same manner as cross-leveling, customers may be able to minimize cash flow using collections for all (or some as desired by the purchasing country) cases and average cash flows on a country (vice case) basis via a process known as special billing. Since requirements and procedures are unique to each country, they are normally established in an agreement between the customer country, DSCA, and the appropriate banking institutions in the U.S. and the purchaser’s country. If a purchaser has an SBA, total expenditures for the forthcoming billing period are subtracted from total available cash resources to determine the billing amount. SBAs override Column 14 (Amount Due and Payable) of the DD Form 645. SBAs are issued by either DSCA or DFAS SCA and are managed at the country level unless an exception has been granted by DSCA. As noted in the SAMM, since each agreement is unique, DSCA should be contacted if additional information is desired. [FMR volume 15, chapter 3, section 030104.E and Definitions, and SAMM C9.10.2]

CASE RECONCILIATION

Reconciliation refers to the financial and logistical actions that ensure proper accounting, accuracy and thoroughness of data, currency of schedules, and timeliness and completeness of reporting. In turn, successful reconciliation throughout the life of a case expedites case closure. Case reconciliation is not a single action. Rather, it is a series of actions (beginning with case implementation) identifying and resolving discrepancies among logistics and financial transactions throughout the life of a case. Reconciliation commences with the implementation of a case and does not end until the case is “final” closed. Reconciliation for closure involves extensive communication between various logistics, financial and contract organizations to ensure associated closure transactions are completed. It is imperative that case and line reconciliation be initiated upon implementation of the LOA to make the closure process described herein timely and easier. By reconciling during case execution, case closure becomes an event instead of a process. DSCA consolidated the case reconciliation and closure policies in SAMM chapter 16. The policies in that chapter apply to both FMS and BPC cases. Unique closure requirements for BPC cases are provided in SAMM chapter 15, section C15.6 (Case Closure). Information contained in SAMM chapter 16 complements the DoD FMR. SAMM chapter 16 also identifies all policies in order to facilitate actions and simplify efforts to research the associated business rules and processes provided in the DSCA Case Reconciliation and Closure Guide (RCG), which is provided in SAMM appendix 7.

Active Case Reconciliation

Active case review and reconciliation, extending from LOA implementation until the case is Supply/Service Complete (SSC), are critical components of effective case management. It is mandatory that each case manager performs an annual case and payment schedule review and/or reconciliation on each case, which includes comparing data between systems, comparing LOA data to performance, comparing LOAs to underlying contracts and comparing systemic data to hardcopy or electronic supporting documentation. Case managers are responsible for the timely reconciliation and closure certification of cases, regardless of how these activities are delegated within the responsible IA. Case managers should not wait until a case is ready to be closed to reconcile the case. Case managers should reconcile and close lines of accounting, requisitions, funding documents, and other program documents

as material is delivered and services are performed. Several important reconciliation actions facilitate case closure. These include:

- Continuous, periodic reconciliation of essential financial data to allow for error detection, correction, and future actions at the earliest possible point in the case life cycle.
- Establishing a comprehensive file of all transactions pertaining to the case. For some cases, this file could be quite large, filling several rooms if the files are maintained in their original form. However, large files may be reduced by the use of electronic media. The data files must also be filed and accessible to case managers and those responsible for final case reconciliation.
- Recording case data with objective evidence. This simply means that every financial transaction, every cost, must be recorded. The recording of financial data in source documents will provide an audit trail which can ensure the safeguarding of customer and USG funds.
- Ensuring case identifiers are recorded in all financial transactions. When the DoD accepts a case it also accepts a fiduciary responsibility, which is, completed once final reconciliation is affected. Those cases where reconciliation cannot be achieved should be referred to the DSCA case closure Executive Committee (EXCOM) [SAMM C16.3].

Supply/Service Complete (SSC)

Eventually, an active line or case transitions into Supply/Service Complete (SSC) status. A process exists (refer to SAMM appendix 7 RCG Figures A7.C2.F15 and A7.C2.F16) for deciding that a case or line is SSC. The reconciliation condition of data (other than that which is preventing item delivery or actual completion of services), the allocation of resources (funding and/or manpower), or the distribution/transfer of workload are not factors in determining when SSC occurs. The IA declares a case or line is SSC when the following events occur by updating the status in the IA system (to include SSC Date) and informing the purchaser: [SAMM C16.2.12.1]

- Verification that all items are delivered; title has transferred.
- Verification that all services have been performed.
 - ◊ Training: Verification that all courses, Mobile Training Teams (MTT) and Extended Training Service Specialist/Language Training Detachments are completed, all Temporary Duties (TDYs) are finished, and all case-funded salary positions have expired.
 - ◊ Period of performance for all other services has elapsed.
 - ◊ Program Management Line (PML): The end point may vary, but may be no later than 12 months after final delivery and/or performance of last non-PML service for the related case(s). Like any other service, the duration of PML must be linked to the period of performance.
- All warranty periods have elapsed.
- No items are in storage.
- If the country is under suspensions and/or sanctions, there are no deliveries pending, and no future deliveries shall occur once sanctions are lifted.

Post-SSC Reconciliation

Once the conditions for SSC are reached, lines and/or cases shall be coded by the IA with this status and the actual date of SSC within five business days in the appropriate security cooperation information management systems. This coding shall not be delayed under any circumstance. The management of blanket order case/line items is generally conducted based on their value. Therefore, the application of SSC status on blanket order cases and/or lines may be accomplished based on the amount of unused value, when appropriate, rather than the absence of open orders. The reconciliation condition of data (other than that which is preventing item delivery or actual completion of services), the allocation of resources (funding and/or manpower), or the distribution/transfer of workload has no application in determining when supply/services completion occurs. To the extent possible, the SSC status of lines and sub-lines should be coded in the Defense Security Assistance Management System (DSAMS) as either completed (CMPLTD) or shipped (SHPD). [SAMM C16.2.12.2]

If the purchaser indicates the intent is to execute the residual value of the FMS case, the IA will include it on the “To Be Kept Open” list upon written notification from the LOA signatory organization until requirements are identified to use the residual case value. At that time, the IA will remove the SSC status on the FMS case and remove it from the “To Be Kept Open” list. Until the case is removed from the “To Be Kept Open” list, the IA should follow-up every sixty days with the purchaser and provide DSCA the current status through the quarterly case closure reporting process. If disposition of the residual case value has not occurred after 180 days, the case should be removed from the “To Be Kept Open” list and a modification to the LOA prepared to return the residual case value. This policy is intended to allow the residual value to be used and is not a blanket endorsement for the addition of funds to the case that will extend the execution phase, which could prolong the reconciliation and closure of the case beyond set standards. [SAMM C16.2.13.2]

CASE CLOSURE

Once a case is SSC, and the requisite verification steps for SSC reconciliation are complete, the case is eligible to be submitted for closure. Case closure is the final phase of the LOA life cycle and is extremely important to the USG and purchaser. A case is submitted for closure once it is reconciled according to procedures for the appropriate closure method. Two broad categories of closure exist including: (1) Accelerated Case Closure Procedures (ACCP), and (2) Non-ACCP.

Accelerated Case Closure Procedures (ACCP)

This type of closure allows a FMS case to be closed after SSC, even if there are Unliquidated Obligations (ULOs) on the case. The required purchaser funds (to pay the ULOs) are placed in a Case Closure Suspense Account (CCSA) pending final resolution of the ULOs. This program is voluntary, except for those countries that have FMF-funded cases, which requires mandatory participation in ACCP for all FMS cases regardless of the funding source. Most countries/international organizations participate or are automatically included in the ACCP process. DSCA maintains the master list of countries and international organizations that participate in ACCP. A list of ACCP participants is provided in the RCG, chapter 3. A case shall be direct final closed (i.e., not interim closed) if the ULO equals zero, even if supporting contracts remain open. The USG and purchaser both prefer that direct final closures are utilized to the fullest extent possible without impacting case closure standards. [SAMM C16.4.1.1.2] For purchasers participating in ACCP, the USG goal is to close cases within twenty-four months of achieving SSC. [SAMM C16.4.1.1.3] The following additional policies [SAMM C16.4.1.1.1] apply for an FMS case to be eligible for ACCP closure:

- Cases are SSC for at least 12 months. The 12 months allows for final reconciliation actions and considers the purchaser’s right to submit an SDR associated with the final delivery. This time period can be reduced, however, if the purchaser confirms in writing (e-mail or meeting minutes are acceptable) that the submission of SDRs is not anticipated. This

statement does not waive the FMS purchaser's right to submit an SDR as indicated in the LOA Standard Terms and Conditions 5.4.

- No outstanding SDRs exist when the case is submitted for closure.
- A case can close under ACCP for which a litigation judgment was issued, even if the settlement has not been paid.
- All accrued costs and the amount of estimated ULO to be expended after interim closure are determined.
- Unused Obligational Authority (OA) is reduced to zero in the IA accounting system and the correct OA/Obligations (R4/RE transactions) balances are reflected in DIFS, unless an exception is granted by DSCA.
- The case is paid in full, i.e., collections equal the expected case closure value. If the case is not yet paid in full, the IA shall continue processing the case for closure and shall forward the closure certificate (and associated 'C1' transaction) to DFAS SCA.
- Performance reports, submitted to DFAS SCA to report all delivered articles and services, have been processed. All estimated billings have been converted to actual billings.
- Costs of articles and services have been reimbursed from FMS Trust Funds to DoD appropriations or USG equity accounts.

Non-Accelerated Case Closure Procedures (Non-ACCP)

Non-ACCP procedures are used to accommodate those countries that have not elected to participate in the ACCP process and who's FMS programs are completely financed with national funds (vice with FMF). While ACCP case closure usually has a higher priority (unless case is designated as DSCA priority or is a BPC), non-ACCP cases with no supporting contracts should be closed as quickly as possible. BPC program cases are also closed under non-ACCP procedures. Non-ACCP closure eligibility requires [SAMM C16.4.1.2.1] the following:

- No outstanding SDRs exist when the case is submitted for closure.
- No ULOs exist on underlying contract ACRNs (Accounting Classification Reference Numbers).
- All costs are determined, final charged and collected.
- All applicable IA systems are fully reconciled with DIFS.
- Unused OA is reduced to zero in the IA accounting system and the correct OA/Obligations (R4/RE transactions) balances are reflected in DIFS, unless an exception is granted by DSCA.
- Performance reports, submitted to DFAS SCA to report all delivered articles and services, have been processed. All estimated billings have been converted to actual billings.
- Costs of articles and services have been reimbursed from FMS Trust Funds to DoD appropriations or USG equity accounts.

Other Closure Information

Case Closure Priorities

The order of priority for case reconciliation and closure is: (1) DSCA focus/priority cases (i.e., identified by DSCA Business Operations Directorate, Financial Policy and Analysis Division that requires priority reconciliation and closure action), (2) BPC cases, (3) ACCP closure candidates, (4) Non-ACCP closure candidates. Only DSCA (Business Operations Directorate, Financial Policy and Analysis Division) can authorize deviations to prioritizing closure for specific cases, countries or closure categories. [SAMM C16.4.2]

Estimated Case Closure Dates

On all LOAs except Foreign Military Sales Order (FMSO) I LOAs, IAs must include a note identifying an estimated case closure date. See SAMM appendix 6 for exact LOA note wording. Cases with long-running contracts may experience closure challenges, but for ACCP cases, the estimated closure date is twenty-four months after the date of projected final delivery or service performance. For non-ACC program cases, the estimated closure date is estimated to be at thirty-six months after closure of the longest underlying contract (if applicable). If no contracts apply, the closure date should be within thirty-six months after final delivery or service performance.

Closure Inhibitors

Multiple sets of closure inhibitors exist that identify conditions preventing the certification and closure of cases. DSCA prescribes a standard set of pre-certification inhibitors that are used to identify conditions that prevent the certification of cases for closure. These inhibitors are outlined in the SAMM RCG table A7.C3.T5. To varying degrees, the IAs' automated management systems have corresponding inhibitors. In addition, a set of post-certification inhibitors exists that are used to identify conditions that prevent the closure of the case. See SAMM C16.4.9.1 and the Closure Transactions section below for further information on this set of inhibitors.

Case Closure Certificates

The IA ensures the case closure certificate and any other necessary supporting documentation (e.g., ULO closure information for ACCP interim closures) are completed in accordance with established procedures. See SAMM RCG figure A7.C4.F5 for additional details. All case closure certificates are sent via e-mail by the designated IA POCs to DFAS SCA (dfas-in-sca-ccci@dfas.mil). [SAMM C16.4.8]

Closure Transactions

Simultaneously with the submission of the closure certificate to DFAS SCA, the IA must process the 'C1' closure transaction for transmission to DIFS. The 'C1' transaction signifies IA completion of its actions necessary for DFAS SCA to close the case. This transaction is required for all closure submissions. Upon successful interface of the 'C1' transaction, closure data is loaded in the DIFS Case Closure Certificate Inventory (CCCI) and applicable closure status/inhibitor codes are assigned. DIFS closure status/inhibitor codes and their definitions are contained in the SAMM RCG table A7.C4.T5. Other related closure transactions include the 'C3', 'C4' and 'C5'. The 'C3' transaction indicates a case is closed. It is generated by DIFS and sent to the IA. The 'C4' transaction removes the case from the CCCI. The 'C5' transaction reopens a non-ACCP case or moves an ACCP case from Final to Interim closed status. Both the 'C4' and 'C5' transactions are initiated by the IA and sent to DIFS [SAMM C16.4.9].

Case Closure in DIFS

DFAS SCA reviews the case closure certificate and takes actions to close the case in DIFS. If DFAS SCA has questions about the closure certificate, DFAS SCA contacts the IA representative listed on the certificate. IAs check the DIFS case closure inventory as needed to determine which cases have been closed. DFAS SCA should close all cases that do not have any outstanding or unresolved issues within 30 days of closure certificate and acceptance of a 'C1' closure transaction. [SAMM C16.4.9.3]

SUMMARY

Proper Security Cooperation funds management requires the FMS and BPC managers to acquire an understanding of a myriad of financial policies and procedures. Each LOA must document the financial requirements to deliver the requested materials and/or services. This is accomplished using multiple LOA data entries, including terms of sale, prices, payment schedule, notes, etc. For a case to be implemented, IAs must request OA, and the OA must be passed from DFAS SCA to the applicable IA. OA allows the IA to prepare and process funding documents on behalf of the purchaser. Expenditure authority must be requested by the IA from DFAS SCA in order to pay bills as a result of material delivered and services rendered.

The methodology employed in determining LOA prices depends on whether the price is to be developed before the fact as an estimate on the LOA, or after the fact as the reporting of a cost in the billing system. In either case, DoD personnel responsible for pricing and reporting costs must refer to current regulations and policies. The basic method involves the determination of a base cost (e.g., stock, inventory, procurement) plus other authorized applicable charges (e.g., administrative charge, accessorial charges, etc.) for the USG to recover total cost. Although the pricing methodology is relatively simple, estimating the cost elements for allocation to a security cooperation case price can be difficult.

FMS billing provides a mechanism for complying with the requirements of the AECA in that FMS is to be conducted in a "no loss" manner to the USG, and payments are to be made in advance of USG expenditures on the purchasers behalf. IAs report the cost of DoD services, inventory, and new procurement sales to DFAS SCA using the "Delivery Transaction." The basic FMS billing document is the DD Form 645, which is prepared at the end of each calendar quarter. This form serves as both a billing document and a statement of account. Numerous attachments, as applicable, accompany the DD Form 645, to include the "FMS Delivery Listing," "FMS Reply Listing to Customer Request for Adjustments," "Holding Account Statement," "FMS Financial Forecast," and the "Accelerated Case Closure Suspense Account Statement."

DELIVERY SOURCE CODES (DSC)

This field is a two alpha code. Codes in the field provide an audit train between performance and the pricing requirements. The code is used by DFAS SCA to recognize earnings for authorized performance charges; therefore, it is imperative that the correct codes be used. An incorrect code could result in the FMS purchaser being over or undercharged. The full list of all the current authorized (per the FMR) Delivery Source Codes (DSC) are listed on the following pages for reference.

Delivery Source Code: Sale of Articles Under AECA Section 21

<u>DSC</u>	<u>Description</u>
AA	DWCF, non-excess items, including technical data package (TDP) and publications, from inventory for a matured FMSO.
AB	DWCF, non-excess items, including TDP and publications, from inventory for other than a matured FMSO
AC	DWCF non-excess items diverted from procurement initiated to maintain stock inventory for a matured FMSO
AD	DWCF non-excess items diverted from procurement initiated to maintain stock inventory for other than a matured FMSO
AE	Procurement funded item, including TDP and publications from inventory, which requires replacement
AG	Procurement funded item, including TDPs and publications from inventory, which does not require replacement
AH	Excess DWCF for a matured FMSO
AJ	Excess DWCF for other than a matured FMSO
AK	Excess Procurement Funded Item from Inventory (applicable PC&H computed on original acquisition cost of item and included in price of item)
AL	Use of this code eliminated beginning FY 2001. Items (other than DWCF item) sold from inventory that are not subject to normal PC&H charge. This code must only be used when the case has a transportation line, a PC&H line, or a pricing exception granted by OUSD(C)

Delivery Source Code: Performance of DoD Services Under AECA Section 21 or 22

<u>DSC</u>	<u>Description</u>
BA	DoD provided training course
BB	Contractor provided training course
BC	Repair or replace FMS purchaser equipment. IAs must include actual PC&H and transportation for materiel consumed in overhaul in reported cost.
BD	Other DoD services. Does not include "above-the-line" transportation or "above-the-line" packing, crating, handling and transportation (PCH&T) associated with repair or modification of consumer owned equipment that is included in repair cost report using code "BC".
BE	Storage charge (for other than FMSO cases)
BF	Depreciation associated with leases
BG	LOA sales of articles and services in connection with lease, prior to, during, or after lease period (includes transportation PC&H refurbishment)

BH	Actual PC&H charge. This report must accompany delivery transactions for items sold from inventory with DSC “AK” and “AL”
BK	DWCF activity services
BT	“Above-the-line” transportation to FMS purchasers that is included in the case. This code includes “high-flight” or special airlift. It does not include the “above-the-line” transportation cost that is included in the selling price of an item or service

Delivery Source Code: Unique FMSO Charges

<u>DSC</u>	<u>Description</u>
CA	FMSO I materiel used to support a system obsolete to DoD use (buy out of unique repair parts to support obsolete end items).
CB	Annual inventory maintenance and storage cost. Charge annually on current FMSO II cases. The FMSO I case manager must input the FMS detail delivery transaction. There is no annual charge for cooperative logistics supply support arrangements (CLSSAs) on DWCF items since the DWCF standard (stabilized) price recoups all costs.
CC	Normal inventory loss on procurement appropriation funded secondary items (physical inventory gain or loss, expiring shelf life, and damage of stored parts). Charge assessed annually on current FMSO II cases. The FMSO I case manager must input the delivery transactions. There is no annual charge for CLSSAs on DWCF items since the DWCF standard (stabilized) price recoups all costs.
CD	Cash advances for on-hand portion of FMSO I cases.

Delivery Source Code: Procurement for FMS Purchasers Under AECA Section 22

<u>DSC</u>	<u>Description</u>
DA	Contractor services (other than training).
DB	DWCF item, TDP, or publications from contractor.
DC	Procurement appropriation funded secondary item from contractor.
DD	Procurement funded principal or major item from contractor.
DE ¹	Progress payment to contractor.
DF ¹	DoD services in support of procurement. This code was previously applied to actual CAS hours prior to establishment of the charge. It now applies to other than CAS services.
DG ¹	Nonrecurring Cost (NC) Recoupment Charges (Research and Development and Production). Identifies amount of NC financed by the FMS purchaser and may be used in calculating the Special NC.
DJ ¹	GFM shipped from inventory.
DK ¹	GFM shipped from another contractor.
DL ¹	PCH&T applicable to procurement appropriation funded GFM.
DX	Contractor efforts in overseas locations that are supported by FMS management lines rather than through normal CAS effort.

NOTE:

¹DSCs DE through DL represent WIP transactions. The breakdown of these charges assures audit trail visibility for pricing purposes. DFAS SCA must treat them as progress payments and report them as such to the FMS purchaser. These charges must be liquidated by one of the contract delivery codes “DA” through “DD” in combination with reimbursement code “N.”

Delivery Source Code: Miscellaneous Charges

<u>DSC</u>	<u>Description</u>
EE	Royalty charge - USG TDP.
EF	Other Federal agency shipment from stock.
EG	Other Federal agency shipment from contractor.
EH	North Atlantic Treaty Organization Petroleum, Oil, and Lubricants.
EJ	Redistribute Military Assistance Program property.
EK	Collection of special nonrecurring production charge or license fee for a third country.
EL	Prepositioning costs.
EM	Interest on arrearage computed in accordance with volume 15, chapter 5. This code is restricted to use by DFAS SCA.
EN	NC recoupment charge for sales from procurement or inventory.

Delivery Source Code: Special Defense Acquisition Fund

<u>DSC</u>	<u>Description</u>
SA	SDAF sales of items originally purchased from DWCF inventories.
SB	SDAF sales of items originally purchased from DoD inventories other than DWCF.
SD	SDAF sales of items procured from contractors for the fund.

Notes:

1. DFAS SCA will compute CAS if price code is "N and reimbursement code is other than "N" unless statutory waiver of contract administration has been made. See paragraphs 080402.D and 080402.P of this chapter.
2. PC&H does not apply to DWCF items with ship dates after September 30, 1990.
3. Administrative costs will be computed unless administrative costs have been waived pursuant to statute.
4. The Inland CONUS transportation charge of 3.75 percent does not apply to DWCF shipments with shipping dates after September 30, 1990. Computation for generic codes L1D and L1E for DWCF items was discontinued on items with shipping dates after September 30, 1991.
5. In this column, A refers to items furnished from DWCF. B refers to inventory items that are not shipped from DWCF. Transportation for inventory items furnished from DWCF to freight forwarders or Canada (except Newfoundland and Labrador) is included in the price. Shipments beyond that point are computed according to table 8-49. Costs for items that are not furnished from DWCFs are also computed according to volume 15, chapter 7 and table 8-50.
6. Transportation costs are computed using the TBC of the transaction. However, if this position is blank, transportation costs are computed using the DTC. If a DTC is not on the DTC table, reject the transaction.
7. Included in actual or estimated actual repair cost.
8. Computed standard PC&H except if RIC begins with "G." RIC that begins with "G" will not have PC&H computed.
9. For DSC "EF" and "EG" when transportation is by GSA (RIC begins with "G") and the TBC is not blank or where the TBC is blank and the DTC is other than "4", the CONUS transportation add-on (generic codes L1A, L1D, and L1E) is not computed. GSA includes CONUS transportation in the price of the item.
